

Gamehaven Wetland Bank (J4869)

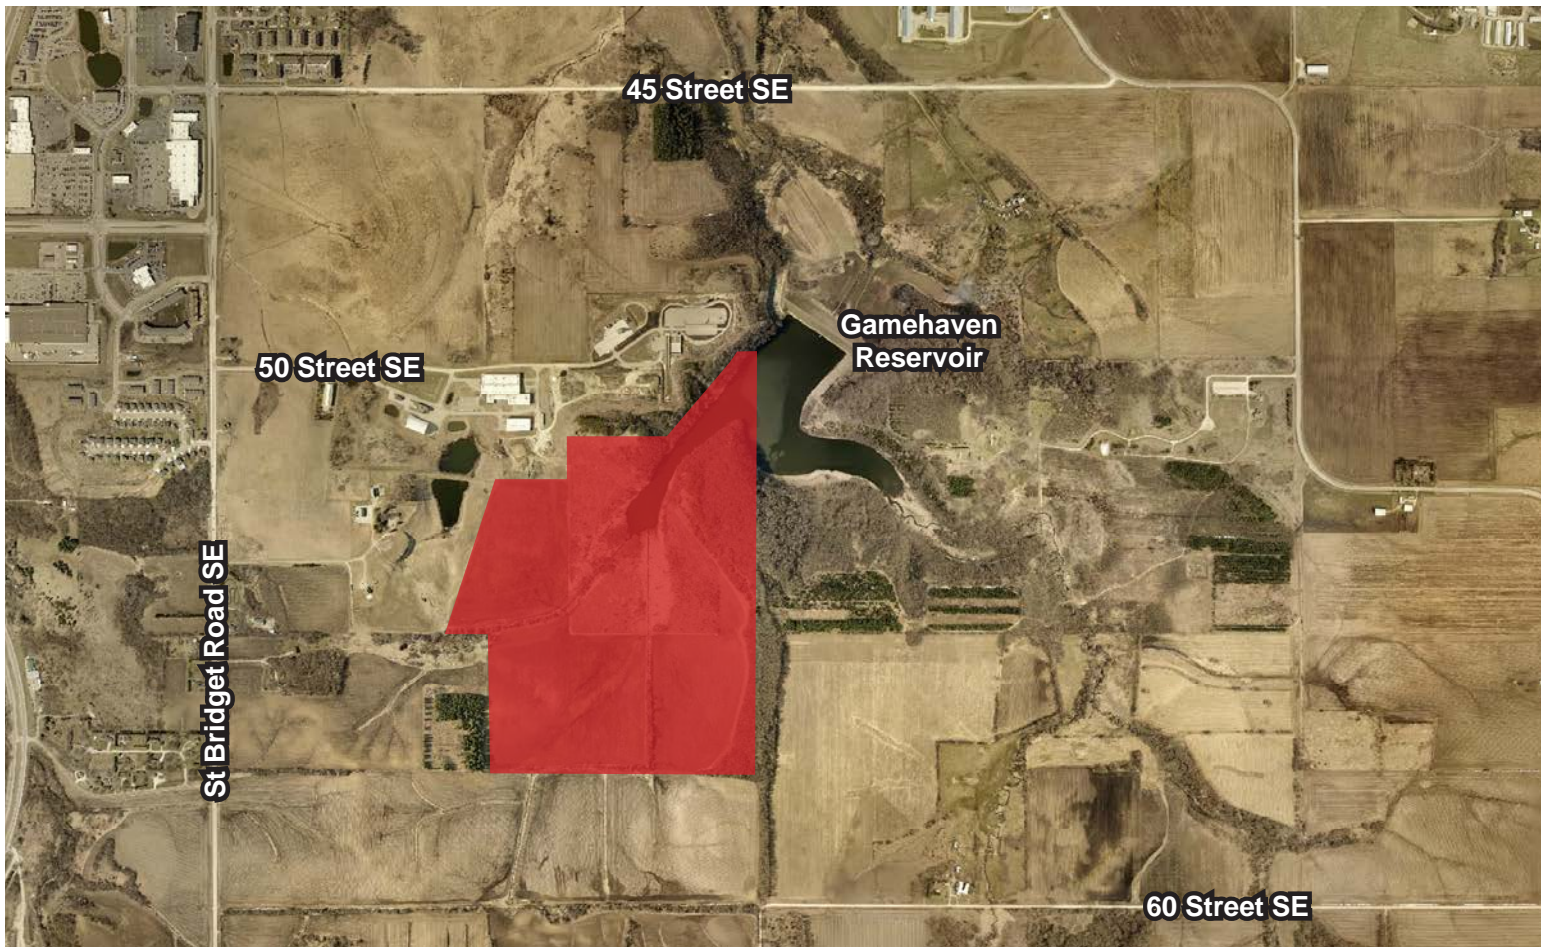

This project will begin in May 2019 and is expected to be completed by November 2019.

A wetland bank with natural buffers will be created on existing City lands along the south side of the WR-4 Reservoir.

Project Benefits

The wetlands and buffers will help provide water quality protection for the reservoir, encourage groundwater infiltration and create wetland credits that can be used on City projects.

Project Location

Project Cost and Funding

The projected cost of the project is \$1.7M and is funded by Flood Control Reserves and Storm Water Utility Fees.
