## **BUILDING PERMIT APPLICATION PROCEDURE** **RESIDENTIAL CONSTRUCTION PROJECT**

The building permit application process begins with submittal of an application and required documents to the Building Safety Department. The process also includes review and approval of a Zoning Certificate by the Community Development Department. Most projects requiring a building permit must be accompanied with building plans and specifications, regardless of the size and scope of the project. (*MN Rules 1300.0130*) A thorough plan review can head off problems that may arise in the field later.

- 🏠 Construction documents shall be dimensioned and drawn upon suitable material.
- 🏠 Construction documents shall be of sufficient clarity to indicate the location, nature, and extent of the work proposed and show in detail that it will conform to the Code and relevant laws, ordinances, rules and regulations as determined by the Building Official.

### **BUILDING PERMIT DOCUMENTS REQUIRED**

- 🏠 A completed building permit application form (available on our web site)
- 🏠 Two sets of complete plans and site specific plans and specifications to be reviewed and approved.
  - ◆ One set will be for the building department and one set to be on site.
  - ◆ One additional set of plans is required if a footing/foundation permit is applied for.
- 🏠 A complete set of plans to submit would include the following:
  - ◆ A certificate of survey
  - ◆ A site plan that shows:
    - lot size
    - building size
    - setbacks from property lines
    - other buildings
    - retaining walls
    - septic systems
    - wells
    - any other items required by Code or Ordinance. (See Zoning Certificate checklist)
