December 15, 2021

INTRODUCTION

This document is being submitted by Mayo Clinic in fulfillment of:

- The provision in Chapter 64D of the Rochester, Minnesota, Code of Ordinances requiring Five-Year Plan Updates for the Medical Institutional Campus Special District
- Chapter 64N requiring Five-Year Plan Updates for the Mayo Support Campus Special District.

These updated narratives and graphics demonstrate the continued support by Mayo Clinic for the concept of the Special District land use and zoning controls. Mayo Clinic facilities and operations are organized around the concept of integrated multi-campus wide operations and functional inter-relationships.

As an integral part of the downtown fabric, Mayo is engaged in planning efforts on many levels, including land use, livability, economic development, higher education, sustainability, and historic preservation. It is not the intention of this document to duplicate, contradict, or supersede any previous or ongoing initiatives. Wherever possible, every effort has been made to keep the Five-Year Plan Update 'in step' with the shared vision of Mayo's neighbors and the City of Rochester.

Planning initiatives considered in the preparation of the 2021 Five-Year Plan Update include:

- Destination Medical Center Development Plan – 2020 Update
- Rochester Comprehensive Plan 2040 – April 2018
- Envision UMR (University of Minnesota Rochester) – A Campus Master Plan for the Next Chapter of Growth – September 2014
- Rochester Rapid Transit Project
- Destination Medical Center District Design Guidelines – June 2017

*The data reported in the following chapters represents a snapshot in time. We acknowledge that these statistics are subject to change, in some cases, on a weekly basis. The cutoff dates for each data set vary slightly and are recorded at the beginning of each chapter.

PART 1.0 | MEDICAL INSTITUTIONAL CAMPUS SPECIAL DISTRICT

SUB-DISTRICT DEFINITIONS AND BOUNDARIES

MAYO SUPPORT CAMPUS SPECIAL DISTRICT

This Five-Year Plan Update addresses three distinct zones for accommodating Mayo Clinic Rochester functions:

1. *Primary Medical Institutional*
2. *Transition*
3. *Non-Contiguous Support*

The **Medical Institutional Campus Special District** was created in 1991 to assist and encourage the development of medical institutional land uses in a campus setting at the Mayo Clinic Downtown and St. Marys Hospital Campuses. Primary Medical Institutional and Transition areas are defined and mapped as part of the Special District, while Non-Contiguous Support properties are not defined or mapped as part of the Special District but are included here for purposes of illustration in support of the concept of integrated campus-wide operations. Functions in the Mayo Support Campus Special District are defined separately.

District Descriptions

The functional areas related to the Special District are defined as follows:

Primary Medical Institutional - The two areas, which correspond to the Mayo Clinic and Mayo Clinic Hospital Methodist Campus ("Central Sub-District") and Mayo Clinic Hospital Saint Marys Campus ("West Sub-District") campuses, create a Medical Institutional Campus Special District with two sub-districts, each with their own zoning constraints.

These two areas include the core of Mayo Clinic institutional uses, in-patient and out-patient medical care, as well as education and research functions and related medical support functions.

Transition - Transition areas are located at the periphery of both the Central and West Primary Medical Institutional Sub-Districts. These are intended to provide a buffer, or physical transition, between large-scale and/or active uses, and adjacent neighborhood residential uses.

Some Primary Medical Institutional uses may occur in transition areas, which will have more zoning restrictions, although the emphasis in such areas will be medical-related extended-care, housing, and support functions.

Non-Contiguous Support - To minimize congestion and other potential impacts, Mayo Clinic has decentralized many support facilities to dispersed sites outside the Primary Medical Institutional areas where possible. Buildings on these non-contiguous parcels are subject to underlying existing zoning code provisions.

Uses on non-contiguous parcels may include parking, receiving and warehousing, waste management and other support functions, such as administration and research support that can functionally be located on dispersed sites. Primary care facilities are now located outside the primary and transition zones to relieve congestion and provide convenience for patients in the Rochester community.

PART 1.0 | MEDICAL INSTITUTIONAL CAMPUS SPECIAL DISTRICT SUB-DISTRICT DEFINITIONS AND BOUNDARIES MAYO SUPPORT CAMPUS SPECIAL DISTRICT

The **Mayo Support Campus Special District** was created in 2003 to allow contiguous growth of certain decentralized administrative and support functions, thereby relieving congestion in the Primary Medical Institutional District. The Support Campus Special District boundaries are shown on page 1.7.

The functional area related to the Special District includes:

Administrative and Support Functions - Administrative and support functions not needing direct adjacency to primary medical areas may be relocated to this campus. This strategy is intended to relieve the Primary Medical District.

See page 1.3 for the relative location of all special districts.

Proposed Modifications and Additions to the Medical Institutional Campus Special District

While the City of Rochester has grown significantly in population (57,890 in 1985 to 121,395 per the 2020 Census and area through the past thirty-five years, Mayo Clinic in Rochester has seen an even greater rate of growth. The Medical Institutional Campus Special District proposed in 1985, and established in 1991, has effectively allowed both the City and Mayo Clinic to plan infrastructure and facility investments to enable and accommodate this growth. Mayo Clinic expects this growth to continue, so that its cutting-edge global mission in patient care, education, and research continues to be realized. In anticipation of projected growth over the next 25 years, district boundaries were modified in the 2011 Five-Year Update and adopted into the City ordinances in 2012. No changes to the district boundaries are proposed as part of the 2021 Update.

Central Sub-district

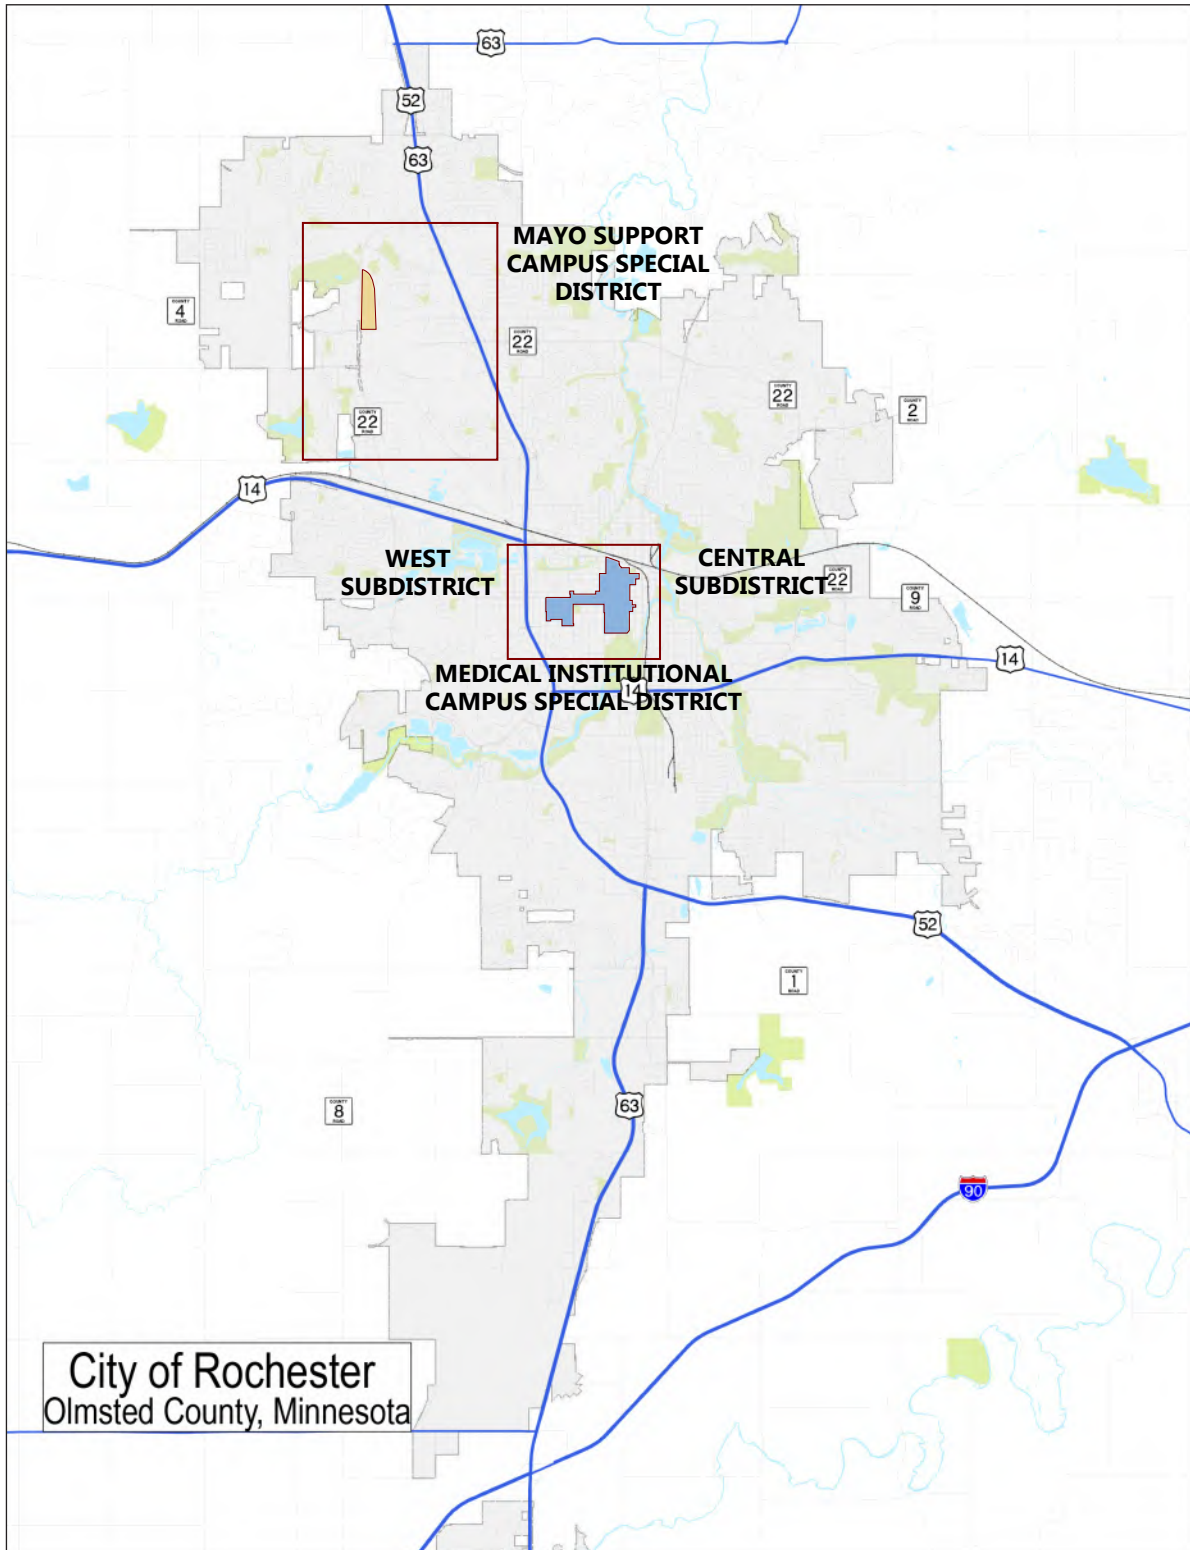

The Central Sub-district was expanded westward in the 2011 Five-Year Update to include properties on both sides of 2nd Street SW, the former Lourdes High School building on West Center Street, and the blocks between 5th and 6th Avenues NW extending north to Civic Center Drive. The current Central Sub-district boundaries are shown on page 1.4. The boundaries, as currently defined, are consistent with growth projections for the next Five-year period, including the first phase of the DMC Discovery Square project. No further expansion of the Central Sub-district is proposed at this time. The proposed Primary Medical Institutional Central Sub-district is illustrated on page 1.5.

West Sub-district

The West Sub-district was expanded eastward in the 2011 Five-Year Update to include properties on both sides of 2nd Street SW including the Ronald McDonald House and The Gift of Life Transplant House and blocks south across 3rd Street to include the Mayo Foundation House. No further expansion of the West Sub-district is proposed at this time. The Current Primary Medical West Sub-district is illustrated on page 1.4. No further expansion of the sub-district is proposed at this time. The proposed Primary Medical Institutional West Sub-district is illustrated on page 1.5.

Page 1.6 shows the relationship between these sub-districts and current zoning and property ownership.

PART 2.0 | MAYO PROPERTY OWNERSHIP AND PROPERTY ACREAGE

The tables and graphics on the following pages illustrate current property ownership by Mayo Clinic within and adjacent to the Primary Medical Institutional Sub-Districts, within the Mayo Support Campus Special District as well as properties outside the Districts. All data is current as of January 1, 2021, unless otherwise noted, and is summarized on this page.

SPECIAL DISTRICT AREA

Primary Medical Institutional Districts

	1/1/2021
Central Sub-District	55.81 acres
West Sub-District	<u>57.30 acres</u>
	113.11 Acres

Mayo Support Campus Special District

	1/1/2021
Mayo Support Center	<u>43.20 acres</u>
	43.20 Acres

Non-Contiguous Support Area

Mayo Clinic-owned property outside of the Sub-Districts but within Rochester city limits.

	1/1/2021
Out of District	<u>372.54 acres</u>
	372.54 Acres

The boundaries as shown are approximate and are intended for illustrative purposes only. They are intended to delineate the amount of Mayo-owned property within the scope of this mapping project.

3.0

PART 3.0 | BUILDING SQUARE FOOTAGE

The tables and graphics on the following pages summarize Mayo Clinic-occupied building square footage within and adjacent to the Central and West Sub-Districts, as well as the Mayo Support Campus Special District. All data is current as of January 1, 2021.

The narrative and drawings show total building area distributed in each Special District and Sub-District. Area for Support Functions such as utility plants, parking and ancillary space within Sub-Districts, warehouses outside the Sub-District, and leased space for support in the Central Development Core are listed separately.

Floor Area – Owned Buildings

Floor areas in owned buildings are calculated as follows:

- Sum of the gross horizontal area of the floors of a building measured from the outside faces of walls.
- Floor area is inclusive of mechanical and sub ground levels.
In floors having openings for multi-level atriums, atrium space is not included.
- Floor levels having occupied space adjacent to or below a court yard and/or street are included (example – under Annenberg Plaza and/or Peace Plaza).
- Subways/utility tunnels between buildings are not included.
Mezzanine levels are the gross of occupied area of floor inclusive of shafts and elevators.
- Not including interior parking spaces, loading space for motor vehicles, or any space where the floor-to-ceiling height is less than six (6) feet.

Floor Area – Leased Space

Floor areas in leased buildings are calculated as follows:

- Partial floor – outside face of walls surrounding and contiguous with leased space.
- Full floor – use Mayo floor area for owned buildings (above).

PART 5.0 | CAMPUS PARKING and VEHICULAR CIRCULATION

December 15, 2021

B | W | B | R

PART 5.0 | CAMPUS PARKING and VEHICULAR CIRCULATION

The tables and graphics on the following pages summarize parking facilities which directly support Mayo operations within the City of Rochester, including employee, patient, and visitor parking. All data is current as of January 1, 2021.

Philosophy

It is the intent and policy of Mayo Clinic to continue to provide a comprehensive transportation program to meet the needs of its Patients, Staff, and Allied Health Staff. Patient and Employee transportation needs represent a dynamic situation necessitating constant balancing and adjustment. Mayo's committed goal is to meet those needs, and provide viable options for all. The further integration of all Mayo Clinic Rochester Campuses has leveraged opportunities for cross-utilization of resources, improving flexibility for meeting evolving transportation and parking needs.

Transportation & Parking

Patients and Visitors – Once patients and visitors have arrived in Rochester, hotel/motel courtesy vans and the Gold Cross Patient Shuttle significantly reduce the need for individual vehicles. The Mayo Patient Shuttle carries approximately 600 people per day between the Downtown and Saint Marys Campuses.

Downtown patient parking needs are met by 2,123 spaces located in three parking ramps and two surface lots, including spaces for persons with disabilities.

The visitor/patient parking ramps on the Saint Marys Campus provide 957 spaces for patient use, including 29 reserved for Emergency Room use, and designated spaces for persons with disabilities. *Valet parking is a contracted service utilizing available parking with no increase in parking demand and fluctuates in response to daily patient volumes.*

Staff, Residents and Allied Health Employees – Currently Mayo Clinic Rochester has 14,615 staff, resident, and Allied Health employee parking spaces.

- Central Campus – 6,043
- West Campus – 2,143
- Mayo Support Campus - 753
- Outside Special Districts – 5,666 including fifteen off-site locations:
 1. 936 - West Shuttle Lot located at 24th Avenue and Second Street Southwest
 2. 870 - East Shuttle Lot located at 1st Avenue and 6th Street Southeast
 3. 1,111 - Superior Drive Support Center, 3050 Superior Drive NW
 4. 0 - Leased spaces in the Third Street City Ramp at 3rd Street and 1st Avenue Southwest
 5. 148- Northwest Clinic (41st Street Professional Building)
 6. 181 - Technology Drive, 3434 Technology Drive NW
 7. 171 - Northeast Clinic, 304 Stonehedge Drive NE
 8. 123 - 2915 Building
 9. 86 - Mayo Employee Federal Credit Union-Cascade Lake
 10. 156 - Southeast Clinic
 11. 35 - East Foundation House – Parking Lot 17
 12. 0 - West Foundation House – Parking Lot 16
 13. 25 - Mayo Employee Federal Credit Union-Canal Place
 14. 1,088 – 41st Professional Buildings
 15. 736 – Lot 38 (Formerly K-Mart)

December 15, 2021

PART 5.0 | CAMPUS PARKING and VEHICULAR CIRCULATION

Historically, the estimated demand for and provision of employee parking has been about 50% of total employee FTEs on the downtown and Saint Marys campuses.

Mayo encourages individuals to use alternate means of transportation so as to not further contribute to the downtown traffic congestion and pollution, and to assist in energy conservation. This is accomplished through:

1. The subsidized bus program, utilized by over 13,300 + employees, offers convenient routes and monthly discount passes. Employees depend upon this service which includes: Commuter service to surrounding communities, and transit city bus service throughout the City of Rochester with designated park and ride locations for Mayo Clinic.
2. Use of carpool vehicles, bicycles and motorcycles as alternative modes of transportation has been encouraged with special parking privileges. Currently, Mayo Clinic Rochester has 840 individual employees in 280 car pools on both Rochester campuses. Mayo provides parking for up to 850 individual bicycles and approximately 300 motorcycles per day. Bicycle and motorcycle parking are easily expanded as demand requires.
3. The employee shuttle service carries over 4,000 employees daily between the medical sub-district campuses to meet business needs, reducing the volume of vehicles traveling between sites during the workday.
4. Park and ride lots are used by approximately 900 to 1,000 employees daily. These lots are located at Chateau Theater, IBM, Target South, Cub Foods SE, and Olmsted County Fairgrounds.
5. Enhanced Pedestrian and Bike Path connections are established through the Kutzky neighborhood linking Cascade Creek with the Saint Marys Campus as well as a link from the Cascade Creek Pedestrian/Bike Path into Downtown. Similarly, connections to the Zumbro River Paths and to Soldiers Field should be encouraged.

Approximately 50% of employees who qualify and accept campus parking privileges utilize parking on any given day. This is due to varying shift schedules, vacations, education and meeting absences, as well as general business needs outside of Rochester.

SUBWAYS and SERVICE DOCKS**

December 15, 2021

B | W | B | R

6.0

PART 6.0 | MATERIALS HANDLING and DISTRIBUTION, SUBWAYS and SERVICE DOCKS

The graphics on the following pages illustrate the network for receiving and distributing materials in support of Mayo Clinic operations at facilities throughout the City of Rochester.

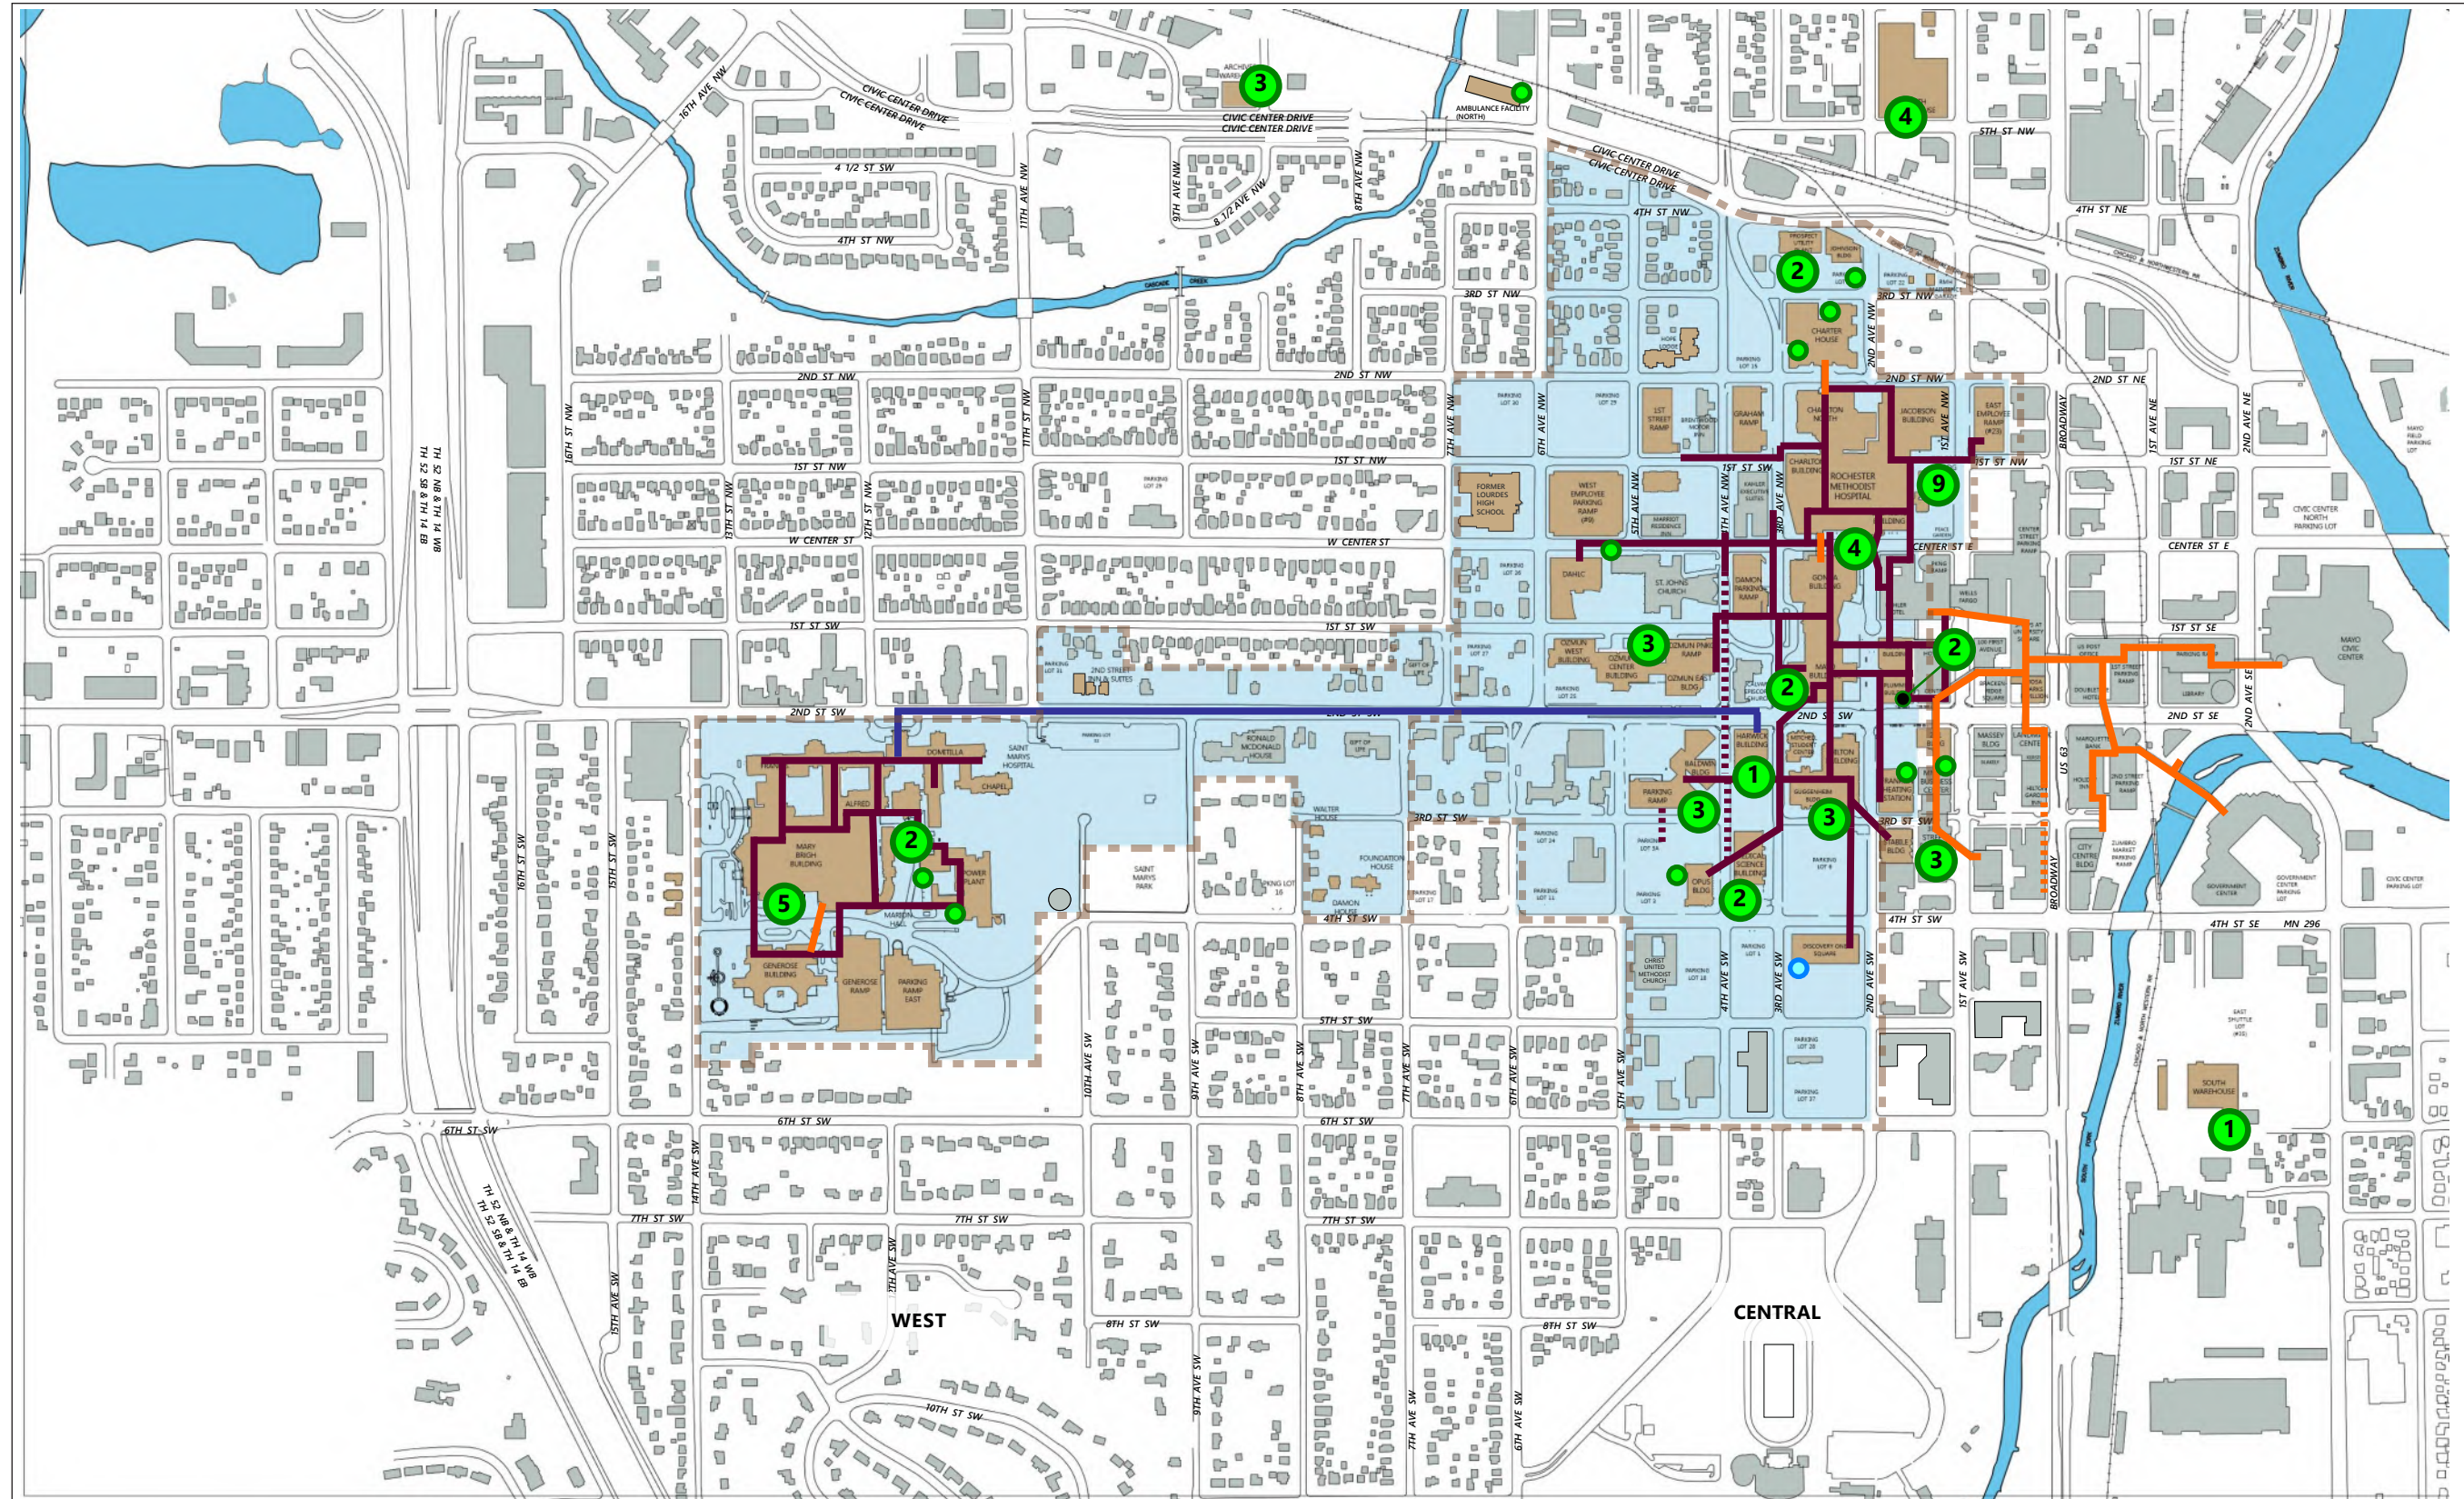

Material Distribution Concept

The Mayo system for material receipt and distribution is predicated on the idea of decentralized receiving and storage in order to reduce on-campus traffic congestion, pollution and improved safety in the medical districts.

Key Elements

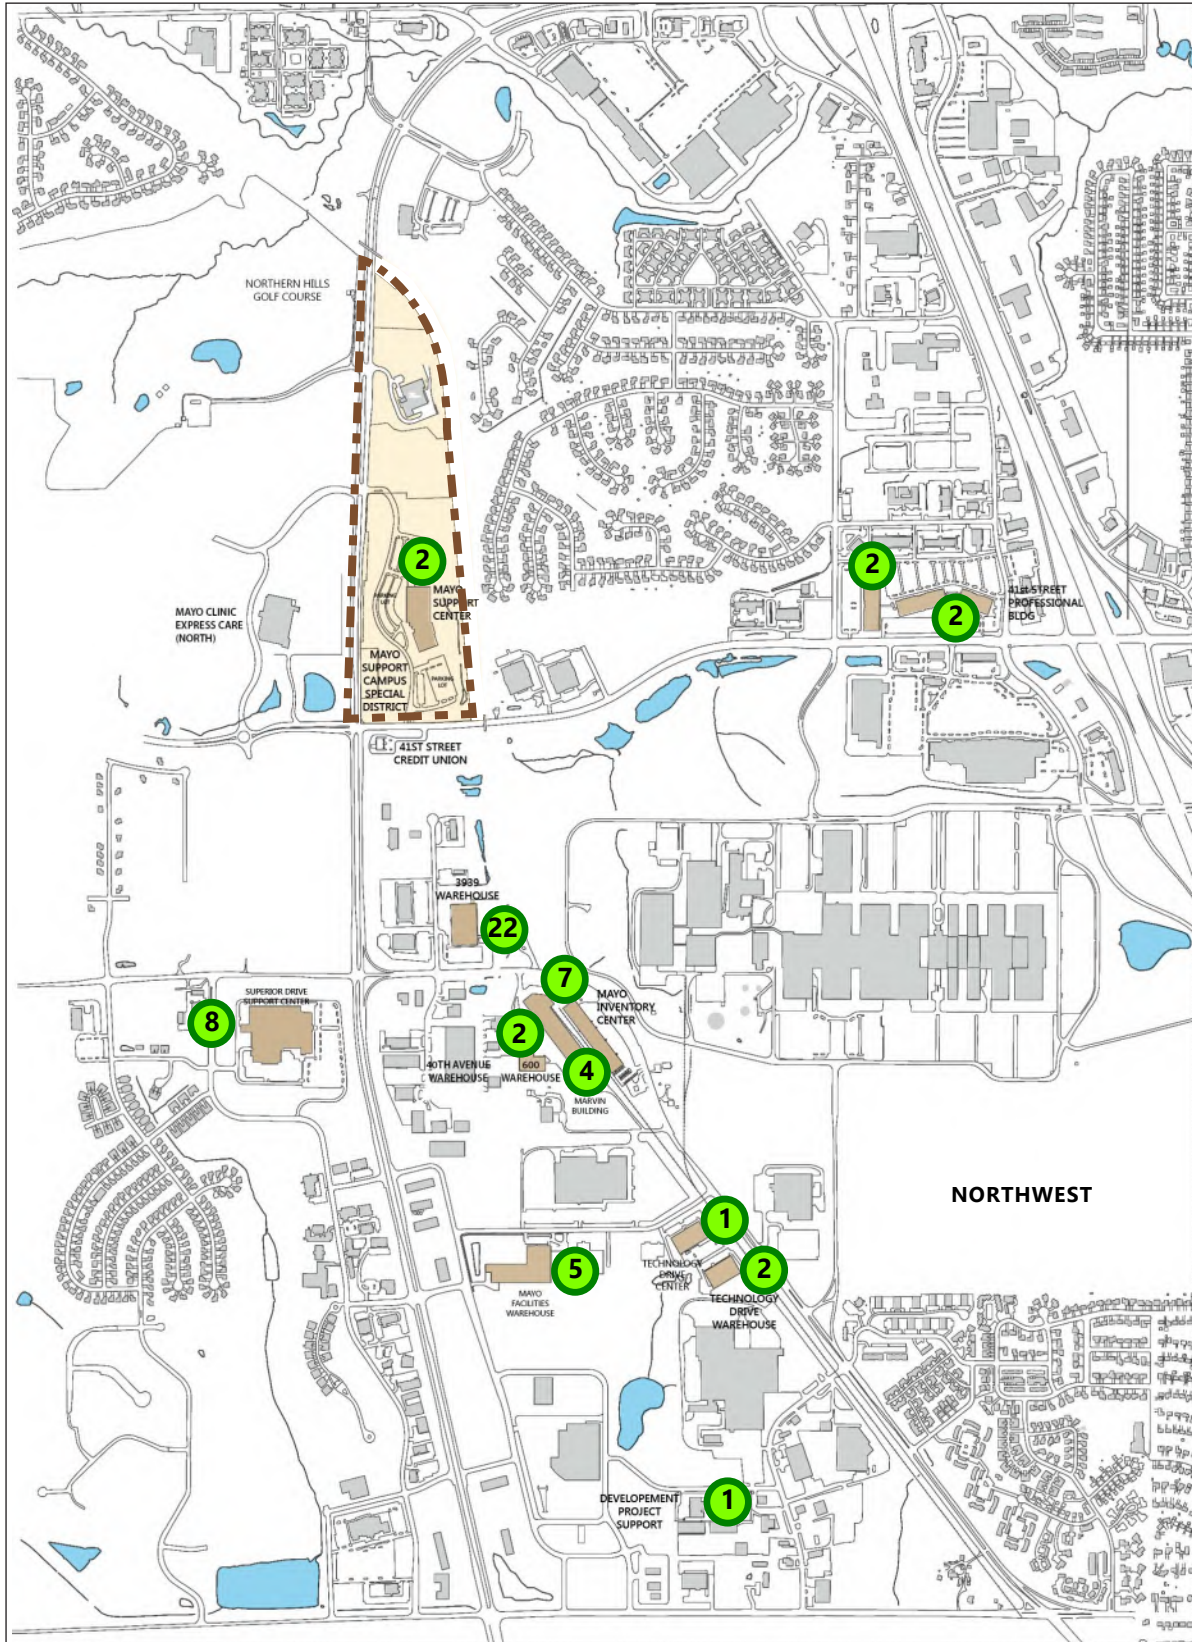

- Remote off-campus warehouses and docks are utilized for bulk receiving, storage, and breakout of over-the-road shipments.
- Peripheral on-campus docks are located for specific receiving and shipping to alleviate congestion and to be proximate to end use or point of collection.
- Interconnecting subway system allows low-impact movement of materials between docks and facilities.
- Pneumatic tube and Electronic Track Vehicle (ETV) transport lab samples, medications, and other small items within and between Mayo downtown and Saint Marys campus facilities.
- Digital Technology for information storage and transfer; is continuing to reduce the need for mechanical transport of images, mail, laboratory results, and medical records.
- Mayo Clinic continues to reduce congestion by moving processes outside the downtown medical districts.

PART 7.0 | UTILITY INFRASTRUCTURE

December 15, 2021

B|W|B|R

7.0

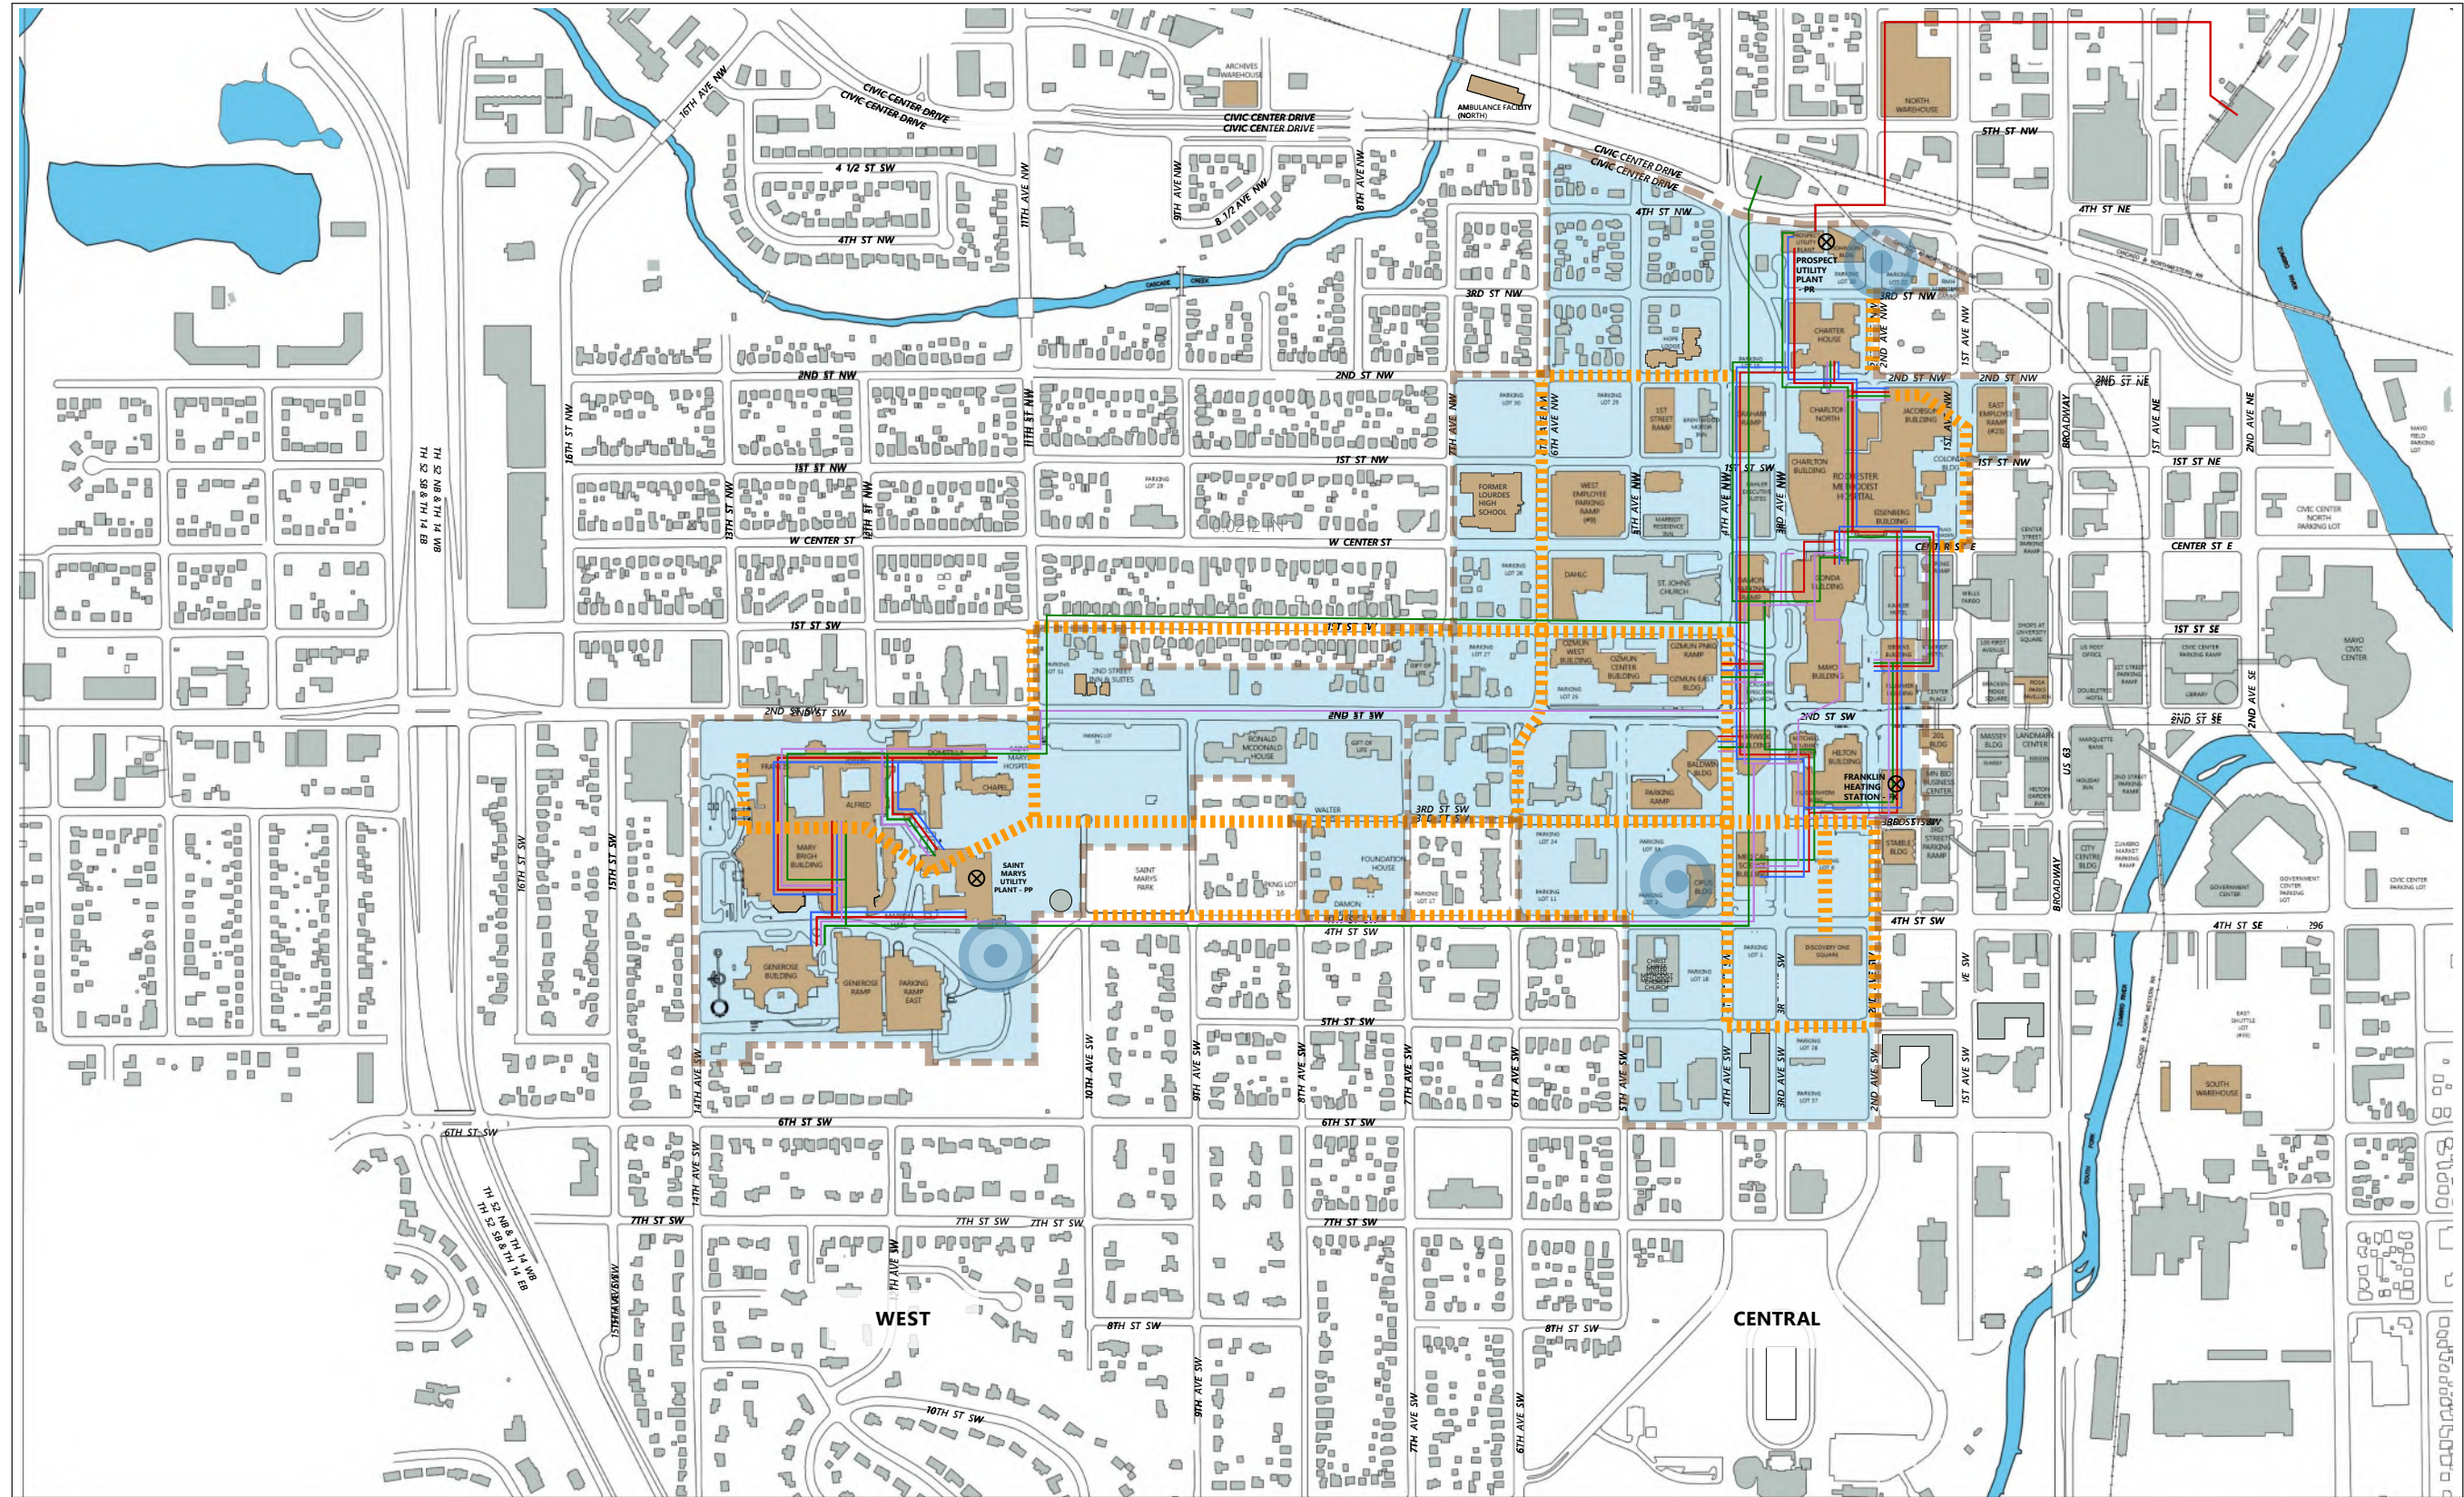

PART 7.0 | UTILITY INFRASTRUCTURE

The graphics on the following pages illustrate the network for producing and distributing utilities throughout the Downtown and Saint Marys campuses. Generation of Mayo's steam, chilled water, and electricity is centered around Franklin Heating Station, Prospect Utility Plant, and Saint Marys Power Plant. Distribution occurs through the subway utility tunnels.

Current and Proposed Improvements

- Reliability and resilience electrical distribution ties occur between campuses. Additional capacity from RPU is planned to provide redundancy for the medical districts.
- DMC resiliency of systems connects both campuses with utility distribution, communication networks and nearly all Mayo buildings.
- Strategies for future provision of communication, steam, chilled water, and electrical utilities are being studied. Potential routes for extension of the utility tunnel loop are also being planned for potential growth in the Central Sub-District. The potential for adding production capacity at the north and south perimeters of the downtown campus and Saint Marys campus is under consideration in response to growth projections.
- Ongoing coordination with the City of Rochester utility improvements and DMC projects.
- Mayo Clinic sustainability program goals include energy conservation as a key focus of the program.

B|W|B|R

PART 8.0 | URBAN GREEN SPACE

December 15, 2021

B | W | B | R

8.0

PART 8.0 | URBAN GREEN SPACE

The graphics on the following pages present a landscape framework of public and private lands that together can create a unique green space network in Rochester, particularly in the center of the City. Mayo is committed to improving and expanding green spaces on its campuses, as evidenced by a number of significant open space developments which already exist. Mayo also intends to monitor DMC-related urban planning recommendations related to urban green space.

Public Parklands

The area in and around the Special Medical Districts has substantial public parklands including Soldiers' Field and Saint Marys Park to the south, and Kutzky Park to the northwest. Central Park and the Zumbro River Corridor also provide open space opportunities in central Rochester.

The downtown Mayo campus is located between the Zumbro River and Cascade Creek, which have benefitted from many improvements due to floodway infrastructure. With its large campus area, Saint Marys has significant topographic and open green space attributes.

Gateways and Campus Portals

Gateway locations have been established at the campus edges where vehicles enter from multiple directions. This includes portals at the north end of 3rd /4th Avenues at Civic Center Drive and at the west end of 2nd Street Southwest at 14th Avenue (near its intersection with Highway 52). A gateway is also planned for the northern portal to the Saint Marys campus at the intersection of 2nd Street and 11th Avenue Southwest as part of the DMC Saint Marys Place. As the southern edge of the downtown campus is developed, locations under consideration for additional portal identification include intersections along 6th Street Southwest near Broadway, particularly at the convergence of the University of Minnesota Rochester and Mayo campuses. Campus portals can be structural and/or landscaped places which respond to the context of each proposed gateway.

As for pedestrian portals between individual DMC districts, wayfinding or place-making elements will be considered along with landscape and structural elements. The location of these portals will emerge as the design of individual DMC districts occur.

Boulevards

Several area streets are important to the character of both the Mayo campuses and downtown Rochester. So it would be appropriate to treat them as boulevards with trees, special lighting, and landscaping. Recently completed upgrades include the north side of 2nd Street Southwest, where boulevard tree planting has been completed, and the boulevards fronting the Jacobsen Building. Other targeted areas include Civic Center Drive, Broadway, and 6th Street Southwest from Broadway to 4th Avenue. Growing conditions for boulevard plantings have been improved with the adoption of policies which reduce winter salt usage and parking lot runoff. Modified snow removal techniques are also beneficial.

The 3rd and 4th Avenues corridor, extending north-south through the Mayo Clinic downtown campus, has the potential for the development of a sequence of gardens and small parks, one of which has already been established south of the Harwick Building and another with the new Statuary Park developed at the Gonda Building entry. As a linkage with such parks, the frontage along both streets should be fully landscaped from 6th Street Southwest to Civic Center Drive. Given the density of zero lot line structures in this corridor, new structures should allow for green space development where possible.

December 15, 2021

PART 8.0 | URBAN GREEN SPACE

The 4th Street and 6th Street Southwest corridors each have their own special residential character, which should be respected between the Saint Marys campus and South Broadway, as they are upgraded with lighting and plantings.

Green Spaces and Places

Mayo continues to establish and maintain small, landscaped green spaces in the downtown campus to improve the public perception and experience. The green spaces include the Annenberg Plaza and the Feith Family Statuary Park at the Mayo/Gonda Building complex, the south lawn, sculpture court and green spaces at the Ozmun Building, the south courtyard at the Harwick Building, and numerous other small spaces which contribute to the network of urban green space, which now includes 3 new rain gardens to help slow surface run-off.

The 50+ acre Saint Marys campus has significant green space with the sensitively landscaped buffer along 10th Avenue and 6th Street Southwest, as well as highly developed areas such as the Peace Garden and Edith Graham Courtyard. The Patient Plaza and green space at the Mayo Campus Gateway at 14th Avenue and 2nd Street is made possible by locating the visitor parking underground.

At the Superior Drive Support Center campus, 2.5 acres of new landscaping has been installed, including 2,500 perennials and 40 trees, along with a storm water detention pond.

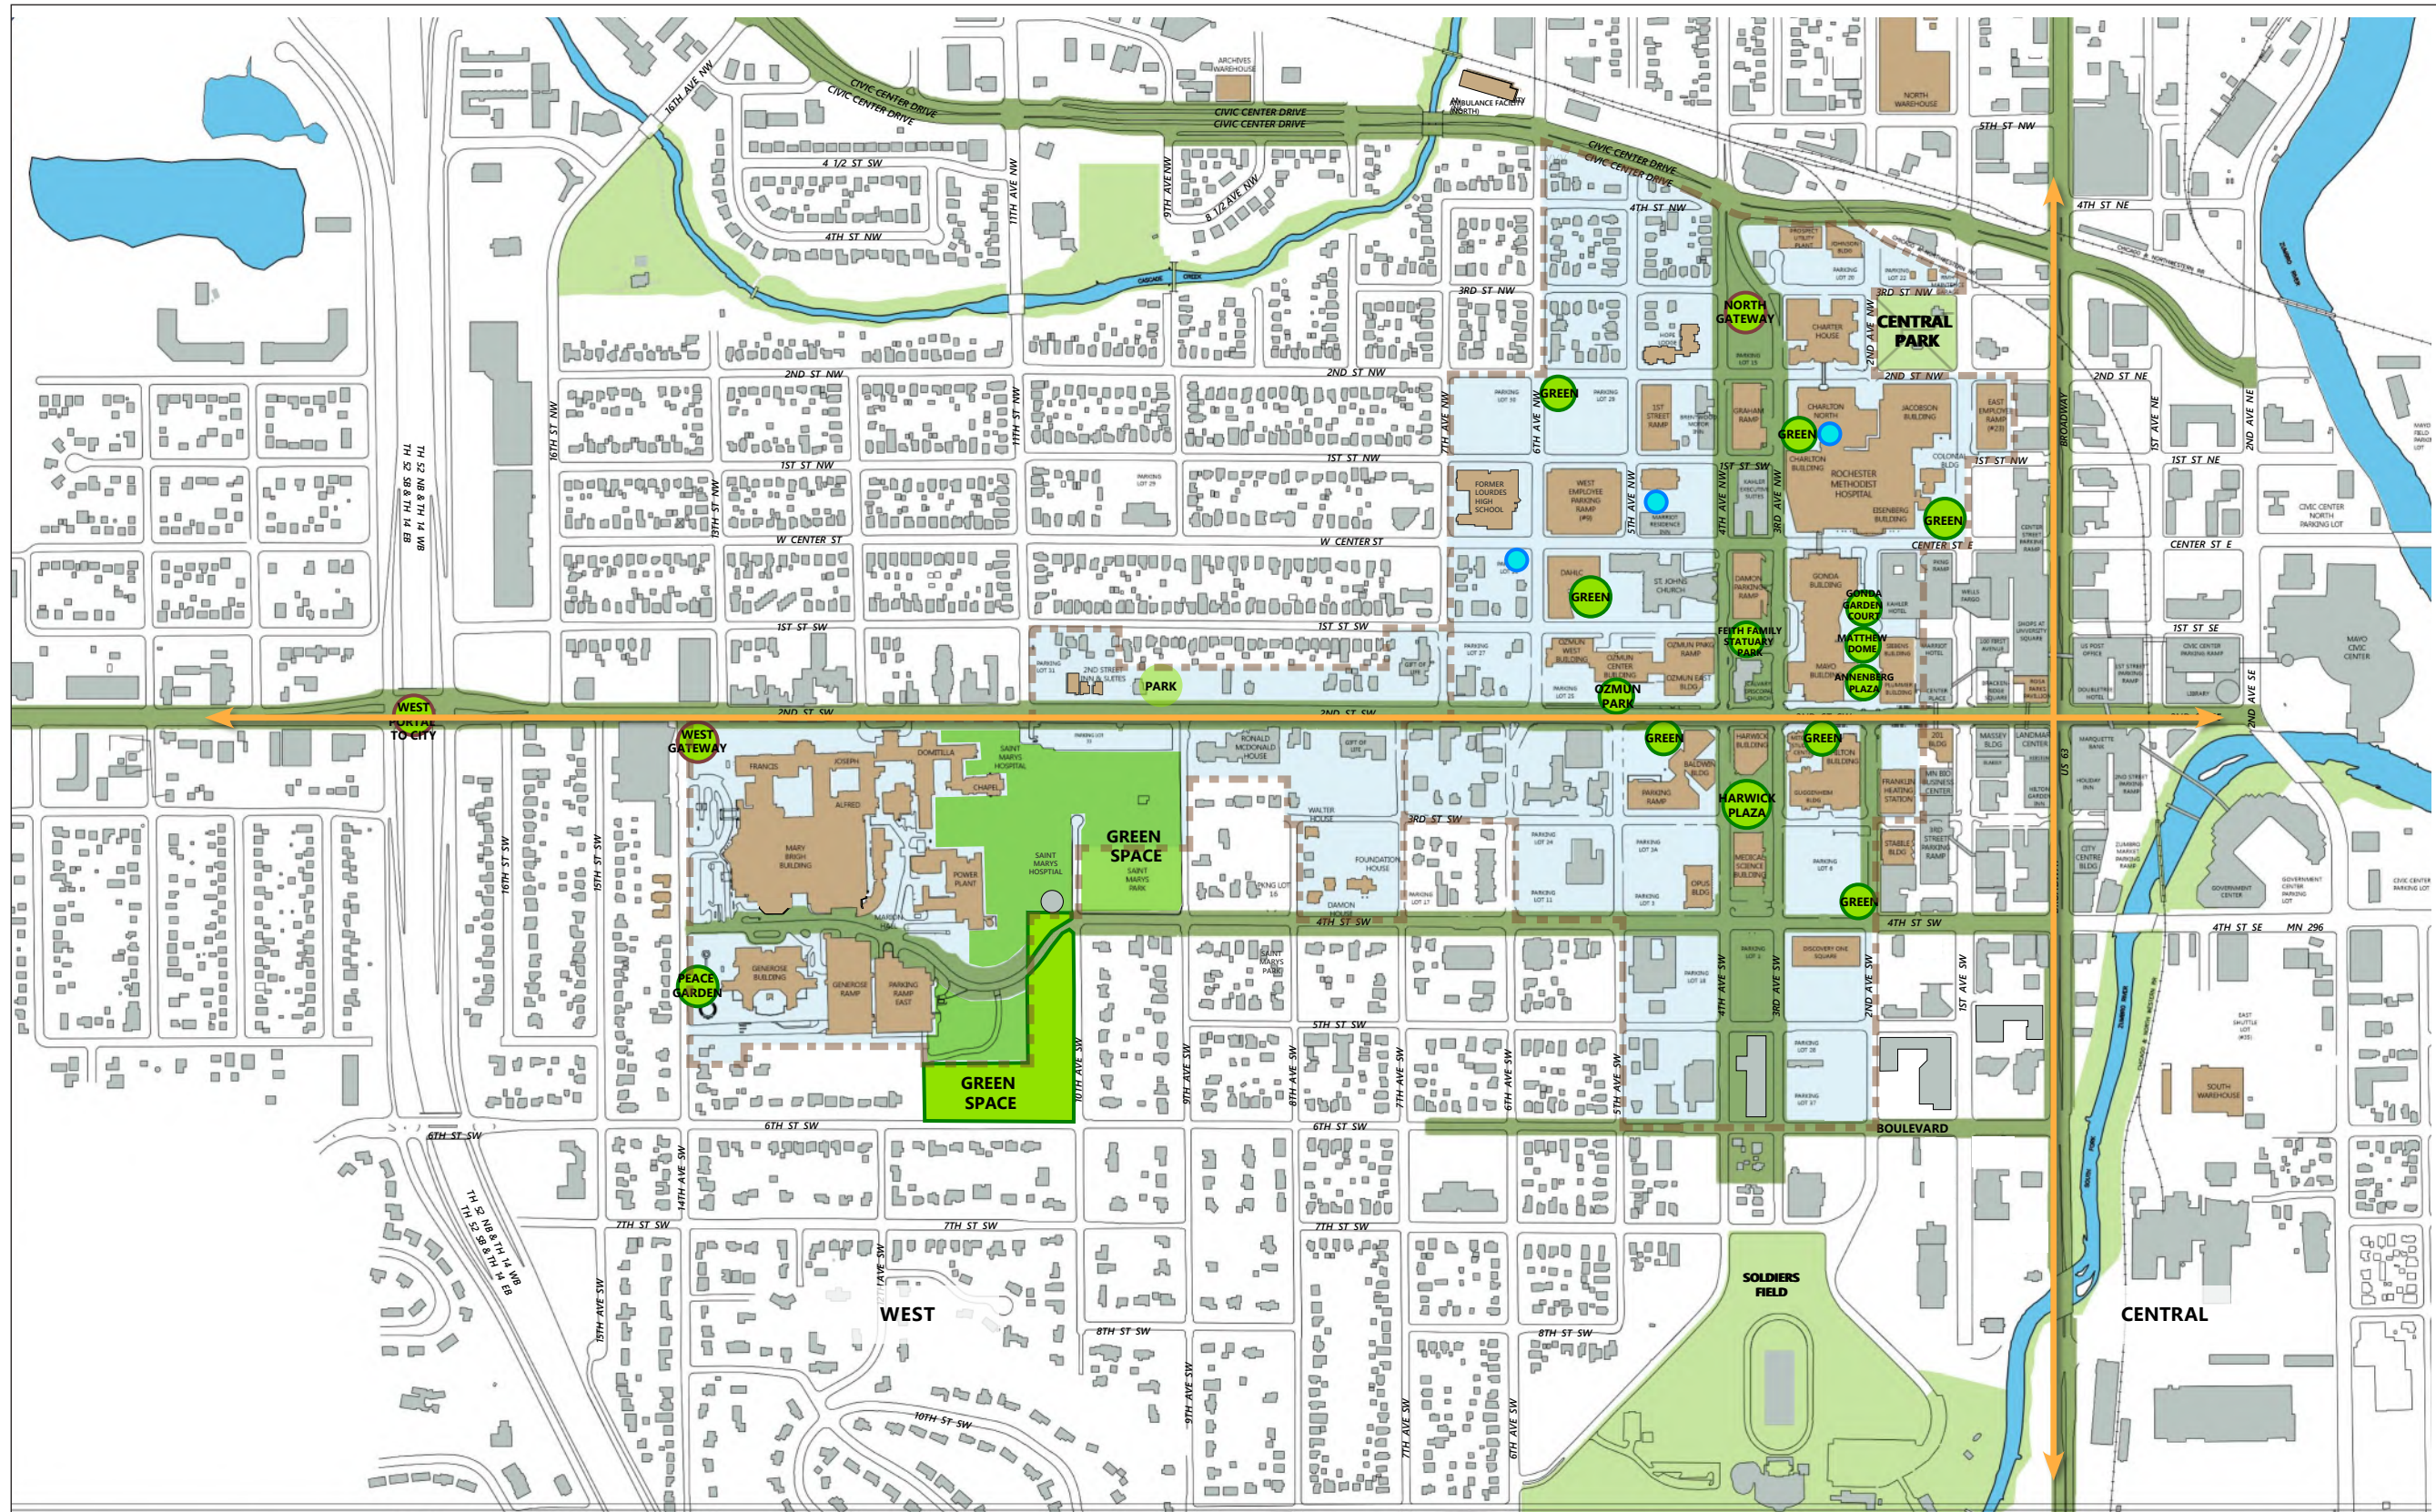

Mayo continues to landscape and green its open spaces as opportunities occur, and supports others, such as the Calvary Episcopal, St. Johns Church and the Hope Lodge which provide very important contemplative spaces in and around the medical campus.

As the campus continues to develop, the goal of providing an enhanced patient experience may suggest the need to vacate certain streets, such as 3rd Street between 2nd and 3rd Avenues Southwest to provide significant green/open space, and provide texture and color for pedestrian areas.

Green Pathways

Enhanced Pedestrian and Bike Path connections should be established through the Kutzky neighborhood linking Cascade Creek with the Saint Marys Campus as well as a link from the Cascade Creek Pedestrian/Bike Path into Downtown. Similarly, connections to the Zumbro River Paths and to Soldiers Field should be encouraged.

Mayo Support Campus Special District
Outside the Medical Institutional and Special Districts

December 15, 2021

PART 9.0 | POTENTIAL PROJECTS: Central Sub-District and West Sub-District Mayo Support Campus Special District Outside the Medical Institutional and Special Districts

POTENTIAL PROJECTS

The following pages contain a listing of potential Mayo projects, which may occur within the Central and West Sub-Districts and the Mayo Support Campus Special District during the next five years.

The list of potential projects is divided by probable function, either Medical, Parking or Support, and are assigned a number designation on the attached graphic illustration, which corresponds to an approximate location within the Central Sub-District (Downtown Campus), West Sub-District (Saint Marys Campus), and Mayo Support Campus Special District.

With the changes that are occurring within the health care sector, there is no certainty that all of these potential projects will occur. DMC-related decisions may also impact project locations.

- C-102 Continued expansions/renovations in Charlton, Eisenberg, Colonial & Jacobson Buildings.
- C-103 Vertical / horizontal expansion of the Jacobson Building.
- C-104 Renovation/replacement of Charlton North Building.
- C-105 Continued renovations of the Gonda Building.
- C-106 Phase Three vertical expansion of Gonda Building.
- C-107 Continued phased renovations of all downtown campus buildings.
- C-108 West horizontal expansion of Baldwin Building.
- C-109 Vertical expansion of Harwick Building.
- C-110 Major expansion of clinical laboratory, research and education space on Blocks 7 & 12, south of Hilton/Guggenheim. Initial phases as well as future expansion.
- C-111 Vertical / horizontal expansion of Opus Building.
- C-112 Heavy Charged Particle therapy facility – North of Charlton and Eisenberg, with potential of a new bed tower and entrance lobby on the West.
- C-113 Renovation of the Dan Abraham Healthy Living Center.
- C-114 Potential Radiology (cyclotron) and/or hyperbaric facility on Block 54, North of Graham Ramp, or Block 44.
- C-115 Kellen Building Fit up
- C-116 Discovery Square 1, 2 and 3 Tenant Space Fit Ups

Parking

- C-201 Expand Parking on Block 5, North of West Employee Ramp
- C-202 New multi-use building and/or expansion of parking on Block 11, North of former Lourdes High School.
- C-203 Provision for a mixed-use project for patient/staff parking ramp, possibly including education administrative & utility support – South of Baldwin Building on Block 2.
- C-204 Expanded parking ramp/loading dock facility on Block 41 (Parking Lot 10) located east of Employee West Ramp or North of St. John’s Church.
- C-205 Expand parking on Block 12.
- C-206 Discover Square Parking Ramp
- C-207* East Lot Parking Structure

Support

- C-301 Addition to Prospect Utility Plant.
- C-302 New Support Building adjacent to Franklin Station.
- C-303 Subway connection from Baldwin Building to Ozmun East Building.
- C-304 Ongoing remodels to Mayo, Gonda, Baldwin, & Plummer Buildings.
- C-305 Subway connection from Dan Abraham Healthy Living Center to Ozmun Building.
- C-306 Infrastructure / support for Blocks 7 & 12 (subway, parking & utilities).
- C-307 Development of former Lourdes High School site for support activities (blocks 10 and 11).
- C-308* Chilled water storage facility – near distribution location - East Employee Lot, Graham Parking Ramp or South of Baldwin Building (blocks 2 & 14).
- C-309 Subway at Hilton
- C-310 Subway at Ozmun

*Outside of existing Medical Campus Subdistrict Boundaries

Support

- C-309 Downtown Campus utilities expansion/replacement.
- C-310 Potential building, chiller & utilities on Block 12.
- C-311 New South Utility and Plant (blocks 2, 14 or 6).
- C-312 201 Site, mixed use structure
- C-313* Block 37 Loading Dock & Mixed Use Project

*Outside of existing Medical Campus Subdistrict Boundaries

POTENTIAL PROJECTS

MAYO SUPPORT CENTER SUB-DISTRICT – Construction Projects

Medical

S-101 Northwest Primary Care.

Parking

S-201 Parking ramp at South.

S-202 Parking ramp at North.

Support

S-301 Administration office and support buildings.

S-302 Underground utilities loop.

S-303 Phased renovation of all buildings in district.

PART 9.0 | POTENTIAL PROJECTS:
Central Sub-District and West Sub-District
Mayo Support Campus Special District
Outside the Medical Institutional and Special Districts

POTENTIAL PROJECTS
OUTSIDE MEDICAL SUB-DISTRICTS – Other Potential Planning / Projects

1. Underground subway connections to Bus Rapid Transit at Saint Marys Campus, 6th Ave., and 2nd Ave.
2. Support for construction of a Downtown Transportation Center.
3. Support for medical-hospital housing, medically related retail, and service functions along Second Street SW. properties.
4. Potential vertical expansion of Archive Warehouse.
5. Expansion of Facilities Warehouse.
6. Construction of an Employee Parking Ramp and Support Building at East Lot.
7. Construction of off-campus utility plant.
8. Expansion of Waste Management Facility.
9. Institute Hills Farm research support facilities renovation & expansion.
10. Development of South or Southwest property for Primary Care.
11. Expansion / renovation of Northwest warehouse facilities for clinical, administration and/or research activities.
12. Provision of freezer storage warehouse (2915 Warehouse).
13. Expansion of Technology Drive Warehouse or creation of additional office space in NW.
14. Replacement of materials transport, utility and pneumatic tube connections between Central and West Sub-districts (to be coordinated with reconstruction of 1st Avenue SW).
15. Expansion of Mayo Family Clinic Northeast.
16. Expansion / renovation of Superior Drive Support Center.
17. Lab Expansion (SDSC Phase II Building).
18. Lab Expansion (SDSC Phase IV Parking Ramp).
19. Building renovation of 41st Street Building.
20. Cell therapy lab/GMP facility (potential locations- DMC district, NW Warehouse, 41st Street Building).
21. Phased renovation of all buildings in district.
22. Relocation of Recycling Center from East Parking Lot, with location to be determined.
23. Consolidated Service Center, with location to be determined.

PART 10.0 | APPENDICES:

GLOSSARY OF TERMS

December 15, 2021

GLOSSARY OF TERMS

BGSF (Building Gross Square Feet)

The total area of a facility including outside walls, mechanical spaces and canopies.

BUILDABLE AREA

The area of a lot remaining after the minimum yard or setback requirements have been met.

FAR (Floor Area Ratio) - Individual Parcel

The ratio of the total floor area of buildings on a certain location to the size of the lot it is on, or the limit imposed on such a ratio. A F.A.R. of 2.0 indicates that the total floor area of a building is two times the gross area of the plot on which it is constructed, as would be found in a multiple-story building.

FAR (Floor Area Ratio) - Overlay Zone

The ratio of the total floor area of buildings within the overlay zone to the area of property owned within the overlay zone and transition zones, or the limit imposed on such a ratio. A F.A.R. of 2.0 indicates that the total floor area of Mayo buildings is two times the gross area of Mayo's land area within the overlay & transition zones.

FTE (Full Time Equivalent)

A unit to measure employed persons or students in a way that makes them comparable although they may work or study a different number of hours per week.

INFRASTRUCTURE

The underlying foundation, framework and system supporting a building or city, including roads, water supply, sewers, electrical grids, telecommunications, etc.

NON-CONTIGUOUS SUPPORT

To minimize congestion and other potential impacts, Mayo Clinic has decentralized many Support Facilities to dispersed sites outside the Primary Medical-Institutional areas where possible. Buildings on these non-contiguous parcels are subject to underlying, existing zoning code provisions.

PRIMARY MEDICAL INSTITUTIONAL

The two areas, which correspond to the Mayo Clinic and Rochester Methodist Hospital ("Central Sub-District") and Saint Marys Hospital ("West Sub-District") campuses, create a Medical Institutional Special District with two sub-districts, each with their own zoning constraints. These two areas include the core of Mayo Clinic institutional uses, In-Patient and Out-Patient Medical Care as well as Education and Research functions and related medical support functions.

PUBLIC UTILITY

Any person, corporation or government entity supplying gas, electric, transportation, water, sewer or land line telephone service to the general public.

SETBACK

The minimum separation in linear feet, measured on a horizontal plane, required between the wall of a building and each of its lot lines at a given height.

SITE AREA

All land area within the site as defined in the deed. Area shall be from an actual site survey rather than from a deed description.

SPECIAL DISTRICT

The effect of a special district designation shall be as an overlay district. The regulations established in special district legislation shall supersede the regulations of the underlying zoning district. To the extent they are not inconsistent with the special district regulations, the underlying zoning district requirements shall remain in effect.

TRANSITION AREA(S)

Transition Areas are located at the periphery of both the Central and West Primary Medical-Institutional Sub-Districts. These are intended to provide a buffer, or physical transition, between large-scale, active uses and adjacent neighborhood residential. Some Primary Medical-institutional uses may occur in transition areas, which will have more zoning restrictions, although the emphasis in such areas will be Extended-Care, Housing and Support Functions.

USE

The purpose or activity for which land or buildings are designed, arranged or intended, or for which land or buildings are occupied or maintained.

ZONING MAP

The map or maps which are a part of city ordinances and delineate the boundaries of the zoning districts.

62.400 CENTRAL DEVELOPMENT CORE ZONING DISTRICT TABLES

The Zoning District Tables contained in this article contain the basic lot development standards and site appearance controls applicable to uses in the Central Development Core.

62.410 CENTRAL DEVELOPMENT CORE – CENTRAL BUSINESS DISTRICT AREA

This section lists the standards applicable to uses permitted in the Central Business District Area of the Central Development Core.

62.411 GENERAL ZONING DISTRICT REGULATIONS – CENTRAL BUSINESS DISTRICT AREA/CENTRAL DEVELOPMENT CORE

The following table identifies the general zoning district standards applying to uses in the Central Business District area of the Central Development Core.

STANDARDS

Maximum Floor Area Ratio:
Type I Development: 6.00 Under Incentive Development Provisions of Section 62.600: No Upper Limit <i>REFERENCE: Paragraph 62.115</i>
Minimum Percentage of Landscape Area: 0%
<i>REFERENCE: Definition of Landscape Area & Section 63.130</i>
Maximum Permitted Height: No Limit
<i>REFERENCE: Definition of Height/Exceptions in Paragraph 60.424</i>
Minimum Lot Size: None
<i>REFERENCE: Paragraph 62.116 & Definitions of Lot, Site</i>
Minimum Setbacks:
Required Front Yard: 0 Feet Minimum Required Side Yard: 0 Feet Minimum Sum of Side Yards: 0 Feet Minimum Rear Yard: 0 Feet <i>REFERENCE:</i> <i>General Yard Requirements in Section 63.100</i> <i>Paragraph 63.110(1) & Definition of Front Yard</i> <i>Paragraph 63.110(3) & Definition of Side Yard</i> <i>Paragraph 63.110(2) & Definition of Rear Yard</i>
Transitional Yards:
A front yard or side street side yard equal in width to the front yard required in the adjacent residential zoning districts shall be provided on any lot abutting a side lot line of any lot in the R-1 or R-2 Zoning District.
Off-Street Parking Requirements:
Uses in the Central Business District area of the Central Development Core are exempt from the requirement of providing off-street parking. <i>REFERENCE: Paragraph 63.423</i>
Appearance Controls:
Hours of Operation: No Limit Signs: Residential & Industrial Uses: C All Other Uses: D Exterior Lighting: Residential & Industrial Uses: D All Other Uses: E

62.412 SITE APPEARANCE STANDARDS – CENTRAL BUSINESS DISTRICT AREA/CENTRAL DEVELOPMENT CORE

The standards in this table identify the permitted uses and applicable standards applying to the uses permitted in the Central Business District Area of the Central Development Core.

COMMENTARY: The Row labeled PRIMARY REFERENCE at the top of the chart identifies for users of the ordinance the primary section of the ordinance where regulations for that category of standard will be found. The Row labeled NOTES identifies additional paragraphs in the ordinance that apply to the particular category of standard under which they are listed. ABBREVIATIONS/SYMBOLS in the table: Std is the abbreviation for "Standards"

62.420 CENTRAL DEVELOPMENT CORE – FRINGE AREA

This section lists the standards applicable to uses permitted in the Fringe Area of the Central Development Core.

62.421 GENERAL ZONING DISTRICT REGULATIONS – FRINGE AREA/CENTRAL DEVELOPMENT CORE

The following table identifies the general zoning district standards applying to uses in the Fringe Area of the Central Development Core.

STANDARDS

Maximum Floor Area Ratio:
Type I Development: 4.00 Under Incentive Development Provisions of Section 62.600: No Upper Limit REFERENCE: Paragraph 62.115
Minimum Percentage of Landscape Area: 5%
REFERENCE: Definition of Landscape Area & Section 63.130
Maximum Permitted Height: No Limit
REFERENCE: Definition of Height/Exceptions in Paragraph 60.424
Minimum Lot Size: None
REFERENCE: Paragraph 62.116 & Definitions of Lot, Site
Minimum Setbacks:
Required Front Yard: 0 Feet Minimum Required Side Yard: 0 Feet Minimum Sum of Side Yards: 0 Feet Minimum Rear Yard: 0 Feet <i>REFERENCE:</i> <i>General Yard Requirements in Section 63.100</i> <i>Paragraph 63.110(1) & Definition of Front Yard</i> <i>Paragraph 63.110(3) & Definition of Side Yard</i> <i>Paragraph 63.110(2) & Definition of Rear Yard</i>
Transitional Yards:
A front yard or side street side yard equal in width to the front yard required in the adjacent residential zoning districts shall be provided on any lot abutting a side lot line of any lot in the R-1 or R-2 Zoning District.

62.422 SITE APPEARANCE STANDARDS – FRINGE AREA/CENTRAL DEVELOPMENT CORE

62.450 DETAILED USE REGULATIONS; CENTRAL DEVELOPMENT CORE:

The following paragraphs identify specific requirements applicable to certain types of permitted uses identified in the Zoning District Tables contained in this Article.

62.451 Determining Type III Reviews in the Central Development Core: Uses in the Central Development Core will be processed as Type III uses when the following conditions are found to exist:

- 1) The proposed use involves a designated Type III use.
- 2) The proposed development will exceed the maximum floor area ratio established for the CDC subarea (6 in the CBD, 4 in the Fringe, 1.5 in the Medical area) where the project is located.
- 3) The development involves major changes in the existing public infrastructure, including such items as street closings, trunk sewer/water/steam line relocations, or new access points on any arterial or expressway.
- 4) The off-street parking requirements for the development, when calculated at the rates applicable to be used in the CDC-Fringe, would equal or exceed five (5) percent of the existing supply of off-street parking spaces in the district.
- 5) Any expansion in floor area totaling more than fifty (50) percent of the existing floor area of the building which results in the entire development exceeding the floor area limits for the district.
- 6) Any development adjacent to publicly owned land or facilities (other than right-of-way) which involves changes to these facilities in order to allow for completion of the project.

62.452 Light Industrial Uses in the Central Development Core: Such uses shall not occupy the ground floor street frontage of any building in the district. The street frontage of the building may be used by the same business but activities shall be devoted to non-industrial types of uses such as offices or customer showroom.

62.453 Nursing Homes in the Central Development Core: In the Central Development Core Nursing and Personal Care Facilities are subject to the same intensity and site appearance controls as are applicable to other permitted uses in the district, such as offices.

62.454 Research and Testing in the Medical Subarea of the Central Development Core: In the Medical Subarea of the Central Development Core uses permitted under the category of Research and Testing shall be related to the medical community/industry either by providing support services to existing institutions within the subdistrict or by providing research in the field of medicine on an independent basis.

62.455 Manufactured Home Parks in the Central Development Core: Refer to Paragraph 62.262 (3) for the regulations applicable to Manufactured Home Parks. The General Zoning District Standards in the R-3 Zoning District for Manufactured Home Parks are applicable to Manufactured Home Parks in any of the sub-areas of the Central Development Core. There are specific Site Appearance Standards for the various sub-

areas of the Central Development Core applicable to Manufactured Home Parks with the exception of the Central Business District sub-area. The Site Appearance Standards for Manufactured Home Parks in the Fringe Area of the Central Development Core are applicable to Manufactured Home Parks in the Central Business District sub-area.

62.460 CORE NEIGHBORHOOD ZONING DISTRICT TABLES.

The zoning district tables contained in this article contain the basic lot development standards and site appearance controls applicable to uses in the Core Neighborhood Area surrounding the Central Development Core.

62.461 CORE NEIGHBORHOOD – NEIGHBORHOOD RESIDENTIAL DISTRICT.

This article lists the standards applicable to uses permitted in the Neighborhood Residential District of the Core Neighborhood Area, the “CN-NR District.”

ORDINANCE NO. 2726

AN ORDINANCE RELATING TO ZONING; PROVIDING FOR CREATION OF THE MEDICAL INSTITUTIONAL CAMPUS SPECIAL DISTRICT; AMENDING THE ROCHESTER CODE OF ORDINANCES BY ADDING A CHAPTER 64D.

THE COMMON COUNCIL OF THE CITY OF ROCHESTER DO ORDAIN:

Section 1. The Rochester Code of Ordinances is amended by adding a section to read:

CHAPTER 64D
MEDICAL INSTITUTIONAL CAMPUS
SPECIAL DISTRICT

64D.100 FINDINGS AND DISTRICT BOUNDARIES

Subdivision 1. Findings. It is the finding of the Council that the lands described in Subdivision 3 herein which define the existing and expected area of influence of Rochester's major medical institution land uses are of special and substantial significance to the City of Rochester. In a desire to effectively and efficiently achieve community goals, to assist and encourage the development of medical institutional land uses utilizing a campus development framework important to the continued growth and vitality of the City, and to enable the City and the presently established medical institutional campus to effectively plan for future public capital and private investment, the Common Council hereby creates a special zoning district as provided in Chapter 64A of the Rochester Code of Ordinances to be known as the Medical Institutional Campus Special District. This determination is based upon the following specific findings:

(a) The existing land use patterns of the specific area described herein have been shaped in large part by the developments of the Mayo Clinic, Rochester Methodist Hospital and St. Mary's Hospital. The structures erected by these institutions created an arrangement of buildings with similar uses and interconnected relationships unique to this City.

(b) The Mayo Clinic has conducted its group practice of medicine in Central Rochester. As that practice has grown to international stature, Mayo Clinic's physical campus has grown to cover all or parts of 24 blocks. With the recent merging of Rochester Methodist and St. Mary's Hospitals into the Mayo Foundation, Mayo properties now include almost 120 acres in Central Rochester.

(c) These properties support 3.3 million s.f. of clinical, laboratory research and education space, 3.4 million of square feet of in-patient facilities, 650,000 s.f. of campus support spaces, and structured and surface parking for more than 6900 employees and visitor vehicles, including 1.7 million s.f. of structured parking.

(d) The physical configurations of and interrelationships among these structures are largely governed by advances in medical practice and the unique functional requirements of Mayo's complex Rochester operations.

(e) The physical formula for Mayo's campus was established during the period 1924-28, with construction of the Plummer Building. As the campus has evolved, it has been characterized by spot (block) densities with a Floor Area Ratio (FAR) -- the ratio of building area to land area -- of 12-15; an integrated, all weather pedestrian, records-delivery and materials-handling system; and campus-wide provision for employee and visitor-patient parking.

This formula has been tested and refined over more than 60 years' actual experience; a professional engineering staff assisted by outside consultants has followed day-to-day operations, and made continuous improvements resulting in the highly-efficient delivery of medical services.

(f) Given the unique nature of Mayo's operations, it has not been possible to devise a general zoning code that will both accommodate the singular requirements of Mayo Foundation and adequately guide downtown commercial growth. In the past two decades, each new investment by Mayo Foundation has required a code variance from building density, parking and loading requirements.

(g) This situation has negative short - and long-term implications for both Mayo Foundation and the City of Rochester. In continuously reviewing long-established precedent, both Mayo and the City bear needless expenses in application development and processing, and Mayo additionally loses flexibility and potential economies by observing an enforced waiting period between its Board decisions and permission to apply for a building permit.

(h) For the long term, Mayo Foundation is unable to confidently plan for future investment and growth in Rochester without assurances of permitted clinical use of its land. The City is similarly unable to confidently program its long-range capital investment nor is it able to fully capitalize on Mayo's presence without agreement.

Subdivision 2. Intent. It is the intent of this ordinance to assist and encourage the development of medical institutional land uses in a campus setting by creating special zoning approaches. These new zoning approaches are applicable to institutions which have multiblock common ownership of lands and thereby have developed a campus support system of parking, loading and materials handling, decentralized support facilities reducing campus congestion and an interconnecting system of above and below ground corridors. The Mayo Foundation is the only property owner with these unique qualities which define a campus style land development approach and therefore a campus style zoning approach is reasonable.

It is the intent that the lands owned by the Mayo Foundation within the boundaries of the Special District will define the Medical Institutional Campus within the special district boundary. All special regulations created by this special district will be applicable and in force on only those lands owned by the Mayo Foundation.

Subdivision 3. Description of Lands Contained Herein. The regulation herein after established by this ordinance shall have effect in the following described lands in the City of Rochester, County of Olmsted, State of Minnesota:

Section 2. The Rochester Code of Ordinances is amended by adding a section to read:

64D.200 EFFECT OF REGULATIONS

Subdivision 1. Applicability. The Special District established by this ordinance shall be an overlay zoning district with unique development standards and procedures applicable to development on the properties defined as the Medical Institutional Campus which are those properties owned by the Mayo Foundation or its subsidiaries within the district boundaries. The regulations set forth herein shall not apply to any zoning action on property not owned by Mayo Foundation. For such properties the underlying zoning districts and regulations remain in effect and appear on the official Rochester Zoning Map. Unless otherwise specified within these regulations all other standards and requirements of the Rochester Zoning Code remains in effect. Uses in the Medical Institutional campus-Special District are for the purposes of definition considered nonresidential uses.

Subdivision 2. Special District Medical Institutional Campus Sub-Districts. The regulations established hereinafter for this special district will be uniquely applied in defined Subdistricts within the boundaries of the Special District. The special district will be divided into the following subdistrict areas:

1) Special District 3 - Primary Medical-Institutional Central Subdistrict - This subdistrict is legally described as follows:

Beginning at the centerline intersection of 5th Avenue NW and the south right-of-way line of 5th Street NW and proceeding southeasterly along said south right-of-way and the south right-of-way for the extension of 5th Street NW as indicated on Official Map No. 11 (City Ord 2542) to its centerline intersection with 2nd Avenue NW; thence southerly along the centerline of 2nd Avenue NW to its centerline intersection with 2nd Street NW; thence easterly along the centerline of 2nd Street NW to the midblock line between 1st Avenue NW and north Broadway; thence southerly along said midblock line between 1st Avenue NW and North Broadway to its centerline intersection with 1st Street NW; thence westerly to the centerline of 1st Avenue NW; thence southerly along the

centerline of 1st Avenue NW to its intersection with Center Street; thence westerly to the midblock lot line between 1st Avenue and 2nd Avenue; thence southerly along said mid-block lot line extended to its centerline intersection with 3rd Street SW; thence westerly along the centerline of 3rd Street SW to its centerline intersection with 2nd Avenue SW; thence southerly along the centerline of 2nd Avenue SW to its centerline intersection with 6th Street SW; thence westerly along the centerline of 6th Street SW to its centerline intersection with 5th Avenue SW; thence northerly along the centerline of 5th Avenue SW to its centerline intersection with 4th Street SW; thence westerly along the centerline of 4th Street SW to its centerline intersection with 6th Avenue SW; thence northerly along the centerline of 6th Avenue SW/NW to its centerline intersection with 1st Street NW; thence easterly along the centerline of 1st Street NW to its centerline intersection with 5th Avenue NW; and thence northerly along the centerline of 5th Avenue NW back to the point of beginning.

2) Special District 3 - Primary Medical-Institutional West Subdistrict. This subdistrict is legally described as follows:

Beginning at the centerlines intersection of 14th Avenue SW and 2nd Street SW; thence easterly along the centerline of 2nd Street SW to its intersection with an approximately north-south line located 106 feet east of the extended centerline of 10th Avenue SW; thence southerly along said approximately north-south line to a point approximately 216 feet south of the centerline of 2nd Street SW; thence westerly along an approximately east-west line located approximately 216 feet south of the centerline of 2nd Street SW a distance of approximately 306 feet; thence south along an approximately north-south line a distance of approximately 203 feet; thence easterly along an approximately east-west line to the centerline of 10th Avenue SW; thence southerly along the centerline of 10th Avenue to its intersection with the centerline of the right-of-way line of 4th Street SW; thence west along the extension of said centerline to a point 237.5 feet westerly of the centerline of 10th Avenue SW; thence south along a line 237.5 feet west of and parallel to the centerline of 10th Avenue SW to a point 237.5 feet north of the centerline of 6th Street SW; thence west along a line 237.5 feet north and parallel to the centerline of 6th Street SW a distance of approximately 468 feet; thence northerly along an approximately north-south line to a point approximately 337 feet north of the centerline of 6th Street SW; thence westerly along said line approximately 337 feet north of the centerline of 6th Street SW a distance of approximately 717 feet; thence southerly along an approximately north-south line a distance of approximately 19 feet; thence westerly along an approximately east-west line a distance of approximately 13 feet; thence southerly along an approximately north-south line a distance of approximately 50 feet; thence westerly along an approximately east-west line a distance of approximately 148 feet to the centerline of 14th Avenue SW; and

thence northerly along the centerline of 14th Avenue SW to the point of beginning.

3) Special District 3 - Medical Transition Area lying adjacent to the two Primary Medical Institutional Subdistricts. These subdistricts are legally described as follows:

East Medical Transition Subdistrict (MT-E): Beginning at the centerline intersection of 6th Avenue NW and the south right-of-way line of 5th Street NW and proceeding southeasterly along said south right-of-way and the south right-of-way for the extension of 5th Street NW as indicated on Official Map No. 11 (City Ord 2542) to its centerline intersection with 2nd Avenue NW; thence south along the centerline of 2nd Avenue NW approximately 54 feet to the center line of the right-of-way of the former Chicago and Northwestern Railroad Spur line; thence southeasterly along said railroad right-of-way centerline to the centerline of 1st Avenue NW; thence south along the centerline of 1st Avenue NW to its intersection with the centerline of 3rd Street NW, thence west along the centerline of 3rd Street NW to its intersection with the centerline of 2nd Avenue NW; thence southerly along the centerline of 2nd Avenue NW to its centerline intersection with 2nd Street NW; thence easterly along the centerline of 2nd Street NW to the midblock line between 1st Avenue NW and North Broadway; thence southerly along said midblock line between 1st Avenue NW and North Broadway to its centerline intersection with 1st Street NW; thence westerly to the centerline of 1st Avenue NW; thence southerly along the centerline of 1st Avenue NW to its intersection with Center Street; thence westerly to the mid-block lot line between 1st Avenue SW and 2nd Avenue SW; thence southerly along said mid-block lot line extended to its centerline intersection with 6th Street SW; thence westerly along the centerline of 6th Street SW to its centerline intersection with 2nd Avenue SW; thence southerly along the centerline extension of 2nd Avenue SW to its intersection with an extension of 7th Street SW; thence westerly along 7th Street SW extended to its centerline extension with 5th Avenue SW; thence northerly along the centerline of 5th Avenue SW to the mid block line between 5th Street SW and 4th Street SW thence westerly along said midblock line between 5th Street SW and 4th Street SW to its intersection with 6th Avenue SW; thence northerly along the centerline of 6th Avenue NW to its intersection with the centerline of 4th Street SW; thence westerly along the centerline of 4th Street SW to its intersection with the west property line of city parcel 1600-15000; thence northerly along said west property line of city parcel 1600-15000 to the centerline of the alley between 4th Street SW and 3rd Street SW; thence easterly along the centerline of said alley to the centerline of the alley west of city parcels 1600-14700 to 1600-14835; thence northerly along the centerline of said alley to its extended intersection with the centerline of 3rd Street SW; thence westerly along the centerline of 3rd Street SW to its intersection with the centerline of 7th Avenue SW; thence northerly along the centerline of 7th Avenue SW;

thence easterly 24 feet along the centerline of 2nd Street SW; thence in a northerly direction along the west property line of city parcel 2380-11300 and continuing along the west property line of city parcel 2380-11100 extended to its intersection with 1st Street SW; thence westerly along the centerline of 1st Street SW to the extended east property lines of city parcels 2380-10300 and 2380-10000; thence northerly along said extended east property lines to the intersection with West Center Street; thence easterly along the centerline of West Center Street to its intersection with the west property lines, extended, of city parcels 2380-9400 and 2380-8300, then northerly to the centerline intersection with 1st Street NW; thence easterly along the centerline of 1st Street NW to its intersection with the centerline of 6th Avenue NW; thence northerly along 6th Avenue NW to the point of beginning, less the Primary Medical Institutional Central (PC) subdistrict.

West Medical Transition Subdistrict (TM-W): Beginning at the centerlines intersection of 14th Avenue SW and 2nd Street SW; thence easterly along the centerline of 2nd Street SW to its intersection with an approximately north-south line located 106 feet east of the extended centerline of 10th Avenue SW; thence southerly along said approximately north-south line to a point approximately 216 feet south of the centerline of 2nd Street SW; thence westerly along an approximately east-west line located approximately 216 feet south of the centerline of 2nd Street SW a distance of approximately 306 feet; thence south along an approximately north-south line a distance of approximately 203 feet; thence easterly along an approximately east-west line to the centerline intersection with 10th Avenue SW; thence south along 10th Avenue SW to its intersection with the centerline of 6th Street SW; thence west along the centerline of 6th Street SW a distance of approximately 668 feet; thence northerly along an approximately north-south line a distance of approximately 337 feet; thence westerly along said line approximately 337 north of the centerline of 6th Street SW to a point approximately 161 feet east of the centerline of 14th Avenue SW; then southerly along an approximately north-south line a distance of approximately 19 feet; thence westerly along an approximately east-west line a distance of approximately 13 feet; thence southerly along an approximately north-south line a distance of approximately 50; thence westerly along an approximately east-west line a distance of approximately 148 feet to the centerline of 14th Avenue SW; and thence northerly along the centerline of 14th Avenue SW to the point of beginning, less the Primary Medical Institutional West (PW) subdistrict.

Subdivision 3. Zoning Map. The boundary of the Medical Institutional District Special District described herein in 64D.100 Subdivision 3 shall be identified on the Official Zoning Map as "SD-3".

Each of the three subdistricts described in 64D.200 Subdivision 2 herein shall be identified on the Official Zoning Map. The Primary Medical Institutional Central area shall be identified by the letters

"PC", the Primary Medical Institutional West as "PW", and the Medical Transitional areas as "TM-W" (west) and "TM-E" (east).

Section 3. The Rochester Code of Ordinances is amended by adding a Section to read:

64D.300 MEDICAL INSTITUTIONAL CAMPUS SPECIAL DISTRICT PLANNING DOCUMENTATION

Subdivision 1. Planning Documents. Permitted land use and zoning controls within the special district are based upon the concept of campus-wide operations and inter-relationships. Specific documents are adopted by resolution of the Common Council as part of this special district which reflect this planning concept. These documents will be the specific guide to land use within the boundaries of the special district. The specific documents are described as follows:

(a) A Master Plan which shall describe a statement of mission and purpose, proposed land use areas, distribution of and maximum campus densities, utility infrastructure plans, and campus landscape and open space plans and which shall describe how the Master Plan promotes the purpose of the Rochester Comprehensive Plan;

(b) A comprehensive transportation, parking, loading and materials handling system and all weather pedestrian passage plan, which:

(1) demonstrates through engineering simulations or current operations a capacity to adequately sustain the existing and contemplated development and not overly burden the public utility and transportation management system;

(2) describes long term plans for helicopter operations, including the nature and intended use of helicopter pads and support facilities; site plans for facilities; projections of levels of activity in terms of flights per year; equipment and operation standards; preferred flight approaches; and management plans for receiving and responding to complaints; and

(3) identifies existing and planned programs to meet parking and transportation needs of patients, staff, and employees, specifically identifying programs to encourage use of transit, carpooling, bicycles, and other alternate means of transportation.

(c) A campus boundary description which identifies the existing property ownership of Mayo Foundation within their campus. It also includes a summary of existing floor area within campus area by building and parcel.

Subdivision 2. Documents on File. All documents described in 64D.300 Sub 1 shall be kept on file with the City of Rochester in the office of the Rochester-Olmsted Department of Planning and Housing.

Subdivision 3. Five Year Plans Document Updates. Within two months of the adoption of the Special District and at least every 5 years following the adoption the Mayo Foundation shall provide a written and graphic detail on the status of all planning documents and the anticipated development in the following five year period. The Mayo Foundation shall make a presentation of plans to the Rochester Planning and Zoning Commission and the Rochester Common Council. The purpose of the plan updates shall be to inform the City of projects which may have an impact on capital improvement programming and infrastructure needs. Revisions to master plan documents will not normally be triggered by five year plan updates, and will be considered at separate hearings.

Subdivision 4. Public Notification Requirements

(a) Five year plan updates referenced in 64D.300 Subdivision 3 shall be officially adopted by the Common Council by resolution after review and recommendation by the City Planning and Zoning Commission and the Common Council. The Council shall approve the five year plan update unless it makes a finding that the update is inconsistent with the master planning documents. Consideration of the 5 year plans shall be made in the form of a public hearing before both the Rochester Planning and Zoning Commission and the Rochester Common Council with published notice of the meetings in the official newspaper at least 10 days prior to the meeting date.

(b) Amendments to the planning documents on file referenced in 64D.300 Subdivision 1 Section a and b shall not be accepted by resolution of the Common Council until the City Planning and Zoning Commission and the Common Council consider the proposed amended plans at public hearings. Notice of the hearings to amend the referenced planning documents shall be made by publication in the official newspaper and sending of a mailed notice to property owners within the area subject to the amendment and those within 350 feet of the perimeter boundary of the area subject to the amendment.

Section 4. The Rochester Code of Ordinances is amended by adding a section to read:

64D.400 TRAFFIC MITIGATION STUDIES REQUIRED

Subdivision 1: Traffic Impact Reports. For any new parking structures or expansions to existing parking structures, or new curb cuts onto public streets from the Special District 3 Primary West Subdistrict, Mayo Foundation in cooperation with City of Rochester Transportation staff shall determine the need for a Traffic Impact Study prior to submittal of a zoning certificate application. A Traffic Impact Study shall be prepared and submitted to the city for review if

it is determined that the traffic generated by the facility has the potential to reduce the Level of Service (LOS) on the adjacent street at the access points to the facility or at nearby street intersections, assuming current operational configurations are maintained. In those cases where the resulting LOS will be a LAS A or B, no study would be required. Current description and method of computation for Level of Service as defined in the Highway Capacity Manual shall be used as a guide.

The purpose of the Traffic Impact Study shall be to analyze operational impacts on traffic flow which vehicles utilizing the parking structure will have. The goal of suggested improvements shall be to maintain a Level of Service C, unless the existing LOS is below that, in which case the intent shall be to maintain the existing Level of Service. If it is determined that a study is needed, the extent of the study in terms of affected intersections or street segments to be looked at shall be determined by city staff, using as a guide the standard that any intersection where ramp traffic may make up more than 5% of the peak hour directional traffic is a candidate for study.

Upon satisfactory completion of the Traffic Impact Report as determined by the Zoning Administration, it shall be made available for review by the general public. A notice of availability of the report for inspection shall be published by the City in the local newspaper of record. Copies of the Traffic impact report shall be made available for inspection at the Office of the Rochester City Clerk, the Rochester Public Library at the Office of Planning and Housing. Written responses from the general public concerning the Traffic Impact Report shall be made to the Zoning Administrator within 30 days from the publication of the notice of availability. Upon completion of the 30 day comment period, all written responses received from the public and a recommendation from the Zoning Administrator concerning the Traffic Impact Report shall be forwarded to the Rochester Common Council. The Common Council must by adoption of a resolution find the Traffic Impact Report and its recommended conclusions and recommendations adequate before any administrative branch of the City issue any permits necessary for the parking structure, parking structure expansion or roadway curb opening.

Subdivision 2: Traffic Monitoring Information: The Mayo Foundation shall provide current employment totals as of January 1st of the year; to the City of Rochester upon request of the Department of Planning and Housing, broken down for each Primary Medical-institutional area separately. The purpose of this information shall be to supply the City of Rochester with the basic information needed to determine whether initiation of a joint City-Mayo Medical Campus Traffic Study should be recommended to the Common Council for the purpose of investigating the impact of additional employment growth within the Mayo Foundation on the transportation network serving each of the Primary Medical-Institutional areas. The staff will present to the Common Council a recommendation on the need for a study; the Council shall decide whether to proceed with the study and shall conduct discussions with Mayo and other

affected property owners on the distribution of costs and responsibilities for completion of the study.

It is the intent that such a study would be considered when the impact of recent and near-term future growth results in critical capacity thresholds for the major street system serving either of the primary medical-institutional areas being approached, leading to the anticipation of diminished and/or deteriorating transportation service as additional growth occurs in the future.

Section 5. The Rochester Code of Ordinances is amended by adding a section to read:

The Mayo Foundation shall also provide an annual report of helicopter operations, upon request of the Department of Planning and Housing, including the total number of helicopter take-offs and landings at each helipad, and the number of operations taking place in daytime (7:00 A.M. to 10:00 P.M.) and nighttime hours.

64D.500 SPECIAL DISTRICT DEVELOPMENT STANDARDS

Subdivision 1. Permitted Land Uses

a) The following principal land uses are permitted as of right in the Special District 3 Medical Institutional Campus:

1. Establishments engaged in providing diagnostic services, extensive medical treatment (including surgical services) and other hospital services, as well as continuous nursing service, including general medical and surgical hospitals, specialty hospitals, medical laboratories, outpatient care facilities, medical schools and associated dormitories, medical appliance sales, and similar uses, but not including animal hospitals.
2. Establishments or other facilities for carrying on investigation in the natural or physical sciences, or engineering and development as an extension of investigation with the objective of creating end products, on a contract or fee basis, and including pilot plant operation.
3. Establishments primarily engaged in providing intermediate or long term nursing and health related care to individuals, typically classified as nursing homes.
4. Dwellings providing shelter and services for the elderly, which may include meals, housekeeping, personal care assistance and minor medical services, but not intermediate, long term or extended nursing care for residents.
5. Automobile parking lots and parking structures except that parking lots and structures in the Medical Institutional Campus West Subdistrict shall be intended to serve uses located in that

subdistrict, and not in the Medical Institutional Central Subdistrict.

b) The following land uses which are incidental to the principal use of the building are permitted in the Special District 3 Medical Institutional Campus when within a building housing a principle land use described in 64D.500 Subd. 1a; and occupying less than 50 percent of the total floor area of the building.

Offices, establishments primarily engaged in providing services involving the care of a person or his or her apparel, such as barber shops, clothing rental, reduction salons and health clubs, photographic studios, cleaning and garment services (but not including power laundries or dry cleaning plants) or coin-operated laundries; establishments furnishing services incidental to transportation, such as freight forwarding, parking services, or the arranging of passenger or freight transportation; Restaurants and cafeterias

c) Accessory uses described herein are a permitted use in the Special District 3 Medical Institutional campus:

A building, structure, or use which 1) is clearly incidental to and customarily found in conjunction with a principal use, building, structure, or campus; 2) is subordinate to and serves a principal use, building, structure, or campus; 3) is subordinate in area, extent or purpose to the principal use, building, structure, or campus; 4) contributes to the comfort, convenience, or is of necessity to occupants of the principal building, principal use, or campus. Within the Primary, Transitional, and Medical Institutional West subdistricts, accessory power plants and parking facilities shall serve only those principal and incidental uses which are located in that subdistrict.

Subdivision 2. Campus Floor Area.

The floor area ratio for the Special District Medical Institutional Campus will be calculated for each primary Campus subdistrict (Central or West) and its adjacent Transitional subdistrict. The F.A.R. will be calculated by dividing the floor area of any Foundation owned buildings within each primary subdistrict and adjacent transitional subdistrict by the total lot area owned by the Mayo Foundation within each primary subdistrict and adjacent transitional district. The Maximum F.A.R. for the Primary Medical Institution Central subdistrict and adjacent Medical Transitional Area shall be 6.0. The maximum F.A.R. for the Primary Medical Institutional - West subdistrict and adjacent Medical Transitional Subdistrict shall be 4.0.

Subdivision 3. Setbacks - Bufferyards - Lot Coverage

a) There shall be no required setbacks or yards in the Special District Primary Medical Institutional Campus Subdistricts except

where the Special District Campus adjoins a property with an underlying or existing residential zoning district without a intervening street, alley or permanent public open space and where the lot separated by the district boundary have adjacent front yards. In this case, the first 100 feet of the Special District Campus lot adjacent to the residence district shall provide a frontyard or sidestreet sideyard adjacent to the residence district of the minimum depth required for a frontyard in the residence district. Such yard shall be landscaped except for the necessary drives and walkways and shall not be used for parking.

b) A perimeter bufferyard or setback shall be required along the exterior property lines of each Special District Campus where the Special District boundary abuts a residential zoning district not within the Special District boundary. The perimeter bufferyard or setback width along a street shall be 33 feet from the property line. The perimeter bufferyard or setback along property lines that are not along a street shall be 16' from the property line.

c) Where a Primary Medical Institutional Campus Subdistrict directly abuts or is separated by a public street or alley from property with RI or R-2 zoning a 15' bufferyard or setback from any campus subdistrict property line is required for structures 35' or less in height above the average natural grade along the common lot line. For structures over 35' in height the setback from the common lot line shall be 33'.

d) In the Medical Transitional subdistrict, a bufferyard or setback of 8' measured from the property line shall be provided along all street property lines except where the street faces or fronts a Primary Medical Institutional Subdistrict boundary.

e) In the Medical Transitional Subdistrict all structures erected on a lot which contains less than an entire block front shall be setback from side and rear property lines the minimum setbacks found in the adjacent underlying zone. Where the Medical Transitional Subdistrict lot directly adjoins and has adjacent frontyards with a lot with underlying or existing residential zoning, the first 100 feet of the Medical Transition Subdistrict lot shall provide a frontyard adjacent to the residence district of the minimum depth required for a frontyard in the residence district.

f) In Medical Transitional Subdistricts open parking areas (lots) require no specific bufferyard width or setback except that all parking spaces must be screened by walls, fences, berms and/or landscape plantings to a height of at least 40 inches. If the underlying zoning of the property to be used for a parking lot structure in the Medical Transitional Subdistrict is R-1 or R-2 then the site on which the parking use is to be located must have at least 200' of lot width as measured along the street frontage.

g) Traffic Visibility Corner Lots. In the Medical Institutional Campus Special District no traffic visibility zone shall be required as found in 62.202 of the Zoning Code on corner lots when the intersecting streets creating the corner are controlled by stoplights (semaphores)

h) Subdivision 3. Maximum lot coverage of all structures in the Primary Medical Institutional West Subdistrict shall be 50 percent.

Subdivision 4. Height Limits.

a) There shall be no maximum height for principal or accessory building or structures in the Special District Primary Medical Institutional - Central Subdistrict. In the Primary Medical Institutional - West Subdistrict the maximum height for principal or accessory buildings shall be 210 feet and for parking ramps the maximum height shall be 66 feet as measured to the top of the uppermost parking floor of the parking structure.

b) The maximum height for buildings or structures in the Special District Transitional Medical Campus Subdistrict will be 66'. The height requirement for this section is calculated as follows: 33 feet above grade level is permitted and additional building height is allowed by adding one foot increments for each one foot of additional setback above 33' from the perimeter street line of the Special District.

Subdivision 5. Signs

Signs within the Special District Primary Medical Subdistricts shall be controlled as regulated by the standards of the Rochester Zoning Code in the I (Institutional) Zoning District. Signs in the Transitional Medical Subdistrict shall be regulated by the standards of the Rochester Zoning Code as applied to the respective underlying zone.

Subdivision 6. Parking and Loading

The number of off-street parking and loading spaces required for any new building expansion in the Special District Medical Institutional Campus shall be determined by the goals and standards of the Campus Master Plan.

Off street parking goals shall be determined for each primary subdistrict and its surrounding transitional subdistrict. A parking and loading plan for the Primary Medical District West and adjacent Transitional Medical Area and for the Primary Medical Institutional Central and adjacent Transitional Medical Area will be provided.

Subdivision 7. Hours of Operation

Any permitted use within the Special District Medical Institutional Campus that is involved with continuous primary medical care, provision of emergency medical attention, medical research, laboratory analysis or integral administration of such activities may take place at any time during the day or night.

Subdivision 8. Helipad - Helicopter Accessory Use

Helicopter access must be used for emergency transportation only. All helipads must be located within the primary Medical Institutional Subdistrict boundaries. The Primary Institutional WEST Subdistrict shall have only one primary functioning helipad, however, back-up or secondary helipads may exist within the subdistrict. Helipads must be located as shown in adopted master plan documents.

Section 6. The Rochester Code of Ordinances is amended by adding a section to read:

64D.600 PERMIT ADMINISTRATION

In addition to the requirements of 61.200 of the Zoning Code, every application for a zoning certificate within the Medical Institutional Campus shall be accompanied by a complete and up-to-date document which describes the existing number of parking spaces available within the Medical Institutional Campus by subdistrict, the total amount of floor area within the campus by subdistrict and the total lot area within the Campus by subdistrict.

In order to issue a zoning certificate within the Medical Institutional Campus, the Zoning Administrator must determine if all development standards are met and the proposed use of buildings or structures is consistent with the Special District documents. The zoning administrator shall act upon all applications for zoning certificate and conditional use permits on which he is authorized to act by the provisions of the zoning code within thirty (30) days after they are filed in full compliance with all the applicable requirements. He shall either issue the permits within said thirty (30) days or shall notify the applicant in writing of his refusal and reasons therefore.

Section 7. The Rochester Code of Ordinances is amended by adding a section to read:

64D.700 VARIANCE AND APPEALS

The Rochester Common Council shall be designated as the Zoning Board of Appeals and assume the duties of the Board to hear and decide appeals of any decision made by the Zoning Administrator in the administration and enforcement of this special district and hear requests for variances from the literal provisions of this special district.

Section 8. The Rochester Code of Ordinances is amended by adding a section to read:

64D.800 RESCINDING APPROVAL

The Rochester Common Council may without liability rescind the provisions of this Special District and return the properties to their underlying zoning district at the time of adoption. Rescinding this overlay zoning district shall follow the procedures set forth in Section 61.500 of the Rochester Zoning Code.

Section 9. This ordinance shall be effective from and after its publication.

PASSED AND ADOPTED BY THE COMMON COUNCIL OF THE CITY OF ROCHESTER, MINNESOTA, THIS 18 DAY OF March, 1991.

Thomas B. Selby
PRESIDENT OF SAID COMMON COUNCIL

ATTEST: Debra A. Sumner
CITY CLERK

APPROVED THIS 19 DAY OF MARCH, 1991.

Walter Taylor
MAYOR OF SAID CITY

(Seal of the City of
Rochester, Minnesota)

ORDINANCE NO. 3669

AN ORDINANCE AMENDING AND REENACTING SUBDIVISION 2 OF SECTION 64D.200 OF THE ROCHESTER CODE OF ORDINANCES, RELATING TO THE LEGAL DESCRIPTION FOR THE LAND COVERED BY THE MAYO CLINIC MEDICAL INSTITUTIONAL CAMPUS SPECIAL DISTRICT #3.

THE COMMON COUNCIL OF THE CITY OF ROCHESTER DO ORDAIN.

Section 1. Subdivision 2 of Section 64D.200 of the Rochester Code of Ordinances is hereby amended and reenacted to read as follows:

Subdivision 2. Special District Medical Institutional Campus Sub-Districts. The regulations established hereinafter for this special district will be uniquely applied in defined Subdistricts within the boundaries of the Special District. The special district will be divided into the following subdistrict areas:

3) Special District 3 - Medical Transition Area lying adjacent to the two Primary Medical Institutional Subdistricts. These subdistricts are legally described as follows:

East Medical Transition Subdistrict (MT-E): Beginning at the centerline intersection of 6th Avenue NW and the south right-of-way line of 5th Street NW and proceeding southeasterly along said south right-of-way and the south right-of-way for the extension of 5th Street NW as indicated on Official Map No. 11 (City Ord 2542) to its centerline intersection with 2nd Avenue NW; thence south along the centerline of 2nd Avenue NW approximately 54 feet to the center line of the right-of-way of the former Chicago and Northwestern Railroad Spur line; thence southeasterly along said railroad right-of-way centerline to the centerline of 1st Avenue NW; thence south along the centerline of 1st Avenue NW to its intersection with the centerline of 3rd Street NW, thence west along the centerline of 3rd Street NW to its intersection with the centerline of 2nd Avenue NW; thence southerly along the centerline of 2nd Avenue NW to its centerline intersection with 2nd Street NW; thence easterly along the centerline of 2nd Street NW to the midblock line between 1st Avenue NW and North Broadway; thence southerly along said midblock line between 1st Avenue NW and North Broadway to its centerline intersection with 1st Street NW; thence westerly to the centerline of 1st Avenue NW; thence southerly along the centerline of 1st Avenue NW to its intersection with Center Street; thence westerly to the mid-block lot line between 1st Avenue SW and 2nd Avenue SW; thence southerly along said mid-block lot line extended to its centerline intersection with 3rd Street SW; thence westerly along the centerline of 3rd Street SW to its centerline intersection with 2nd Avenue SW; thence southerly along the centerline of 2nd Avenue SW to its intersection with 6th Street SW; thence westerly along the centerline of 6th Street SW to its centerline intersection with 5th Avenue SW; thence northerly along the centerline of 5th Avenue SW to the mid block line between 5th Street SW and 4th Street

SW thence westerly along said midblock line between 5th Street SW and 4th Street SW to its intersection with 6th Avenue SW; thence northerly along the centerline of 6th Avenue NW to its intersection with the centerline of 4th Street SW, thence westerly along the centerline of 4th Street SW to its intersection with the west property line of city parcel 1600-15000; thence northerly along said west property line of city parcel 1600-15000 to the centerline of the alley between 4th Street SW and 3rd Street SW; thence easterly along the centerline of said alley to the centerline of the alley west of city parcels 1600-14700 to 1600-14835; thence northerly along the centerline of said alley to its extended intersection with the centerline of 3rd Street SW; thence westerly along the centerline of 3rd Street SW to its intersection with the centerline of 7th Avenue SW; thence northerly along the centerline of 7th Avenue SW; thence easterly 24 feet along the centerline of 2nd Street SW; thence in a northerly direction along the west property line of city parcel 2380-11300 and continuing along the west property line of city parcel 2380-11100 extended to its intersection with 1st Street SW; thence westerly along the centerline of 1st Street SW to the extended east property lines of city parcels 2380-10300 and 2380-10000; thence northerly along said extended east property lines to the intersection with West Center Street; thence easterly along the centerline of West Center Street to its intersection with the west property lines, extended, of city parcels 2380-9400 and 2380-8300, then northerly to the centerline intersection with 1st Street NW; thence easterly along the centerline of 1st Street NW to its intersection with the centerline of 6th Avenue NW; thence northerly along 6th Avenue NW to the point of beginning, less the Primary Medical Institutional Central (PC) subdistrict.

Section 2. This ordinance shall be effective from and after the date of its publication.

ORDINANCE NO. 4052

AN ORDINANCE AMENDING AND REENACTING SUBDIVISION 2 OF SECTION 64D.200 OF THE ROCHESTER CODE OF ORDINANCES, RELATING TO THE LEGAL DESCRIPTION FOR THE LAND COVERED BY THE MAYO CLINIC MEDICAL INSTITUTIONAL CAMPUS SPECIAL DISTRICT #3.

THE COMMON COUNCIL OF THE CITY OF ROCHESTER DO ORDAIN:

Section 1. Subdivision 2 of Section 64D.200 of the Rochester Code of Ordinances is hereby amended and reenacted to read as follows:

Subdivision 2. Special District Medical Institutional Campus Sub-Districts. The regulations established hereinafter for this special district will be uniquely applied in defined Subdistricts within the boundaries of the Special District. The special district will be divided into the following subdistrict areas:

1) Special District 3 - Primary Medical-Institutional Central Subdistrict - This subdistrict is legally described as follows:

Beginning at the centerline intersection of the 6th Avenue NW and the south right-of-way line of Civic Center Drive NW (formerly 5th Street NW) and proceeding southeasterly along said south right-of-way to its centerline intersection with 2nd Avenue NW; thence southerly along the centerline of 2nd Avenue NW to its centerline intersection with 2nd Street NW; thence easterly along the centerline of 2nd Street NW to the midblock line between 1st Avenue NW and North Broadway; thence southerly along said midblock line between 1st Avenue NW and North Broadway to its centerline intersection with 1st Street NW; thence westerly along the centerline of 1st Street NW; thence southerly along the centerline of 1st Avenue NW to its centerline intersection with Center Street; thence westerly along the Center Street centerline to the midblock lot line between 1st Avenue and 2nd Avenue; thence southerly along said midblock lot line extended to its centerline intersection with 3rd Street SW; thence westerly along the centerline of 3rd Street SW to its centerline intersection with 2nd Avenue SW; thence southerly along the centerline of 2nd Avenue SW to its centerline intersection with the 6th Street SW; thence westerly along the centerline of 6th Street SW to its centerline intersection with 5th Avenue SW; thence northerly along the centerline of 5th Avenue SW to its centerline intersection with 4th Street SW; thence westerly along the centerline of 4th Street SW to its centerline intersection with 6th Avenue SW; thence northerly along the centerline of 6th Avenue SW to its centerline intersection with 3rd Street SW; thence westerly along the centerline of 3rd Street SW to its centerline intersection with 7th Avenue SW; thence northerly along the centerline of 7th Avenue SW to its centerline intersection with 2nd Street SW; thence easterly along the centerline of 2nd Street SW to its centerline intersection with 7th Avenue SW; thence northerly along the centerline of 7th

Avenue SW/NW to its centerline intersection with 2nd Street NW; thence easterly along the centerline of 2nd Street NW to its centerline intersection with 6th Avenue NW; thence northerly along the centerline of 6th Avenue NW to the point of beginning.

2) Special District 3 – Primary Medical-Institutional West Subdistrict. This subdistrict is legally described as follows:

Beginning at the centerline intersection of 14th Avenue SW and 2nd Street SW; thence easterly along the centerline of 2nd Street SW to its intersection with an approximately north-south line located 106 feet east of the extended centerline of 10th Avenue SW; thence southerly along said approximately north-south line to a point approximately 216 feet south of the centerline of 2nd Street SW; thence westerly along an approximately east-west line located approximately 216 feet south of the centerline of 2nd Street SW a distance of approximately 306 feet; thence south along an approximately north-south line a distance of approximately 203 feet; thence easterly along an approximately east-west line to the centerline of 10th Avenue SW; thence southerly along the centerline of 10th Avenue to its intersection with the centerline of the right-of-way line of 4th Street SW; thence west along the extension of said centerline to a point 237.5 feet westerly of the centerline of 10th Avenue SW; thence south along a line 237.5 feet west of and parallel to the centerline of 10th Avenue SW to a point 237.5 feet north of the centerline of 6th Street SW; thence west along a line 237.5 feet north and parallel to the centerline of 6th Street SW a distance of approximately 468 feet; thence northerly along an approximately north-south line to a point approximately 337 feet north of the centerline of 6th Street SW; thence westerly along said line approximately 337 feet north of the centerline of 6th Street SW a distance of approximately 717 feet; thence southerly along an approximately north-south line a distance of approximately 19 feet; thence westerly along an approximately east-west line a distance of approximately 13 feet; thence southerly along an approximately north-south line a distance of approximately 50 feet; thence westerly along an approximately east-west line a distance of approximately 148 feet to the centerline of 14th Avenue SW; and thence northerly along the centerline of 14th Avenue SW to the point of beginning.

Together with:

Beginning at the centerline intersection of 11th Avenue SW and 2nd Street SW, Rochester, MN; thence easterly along the centerline of said 2nd Street SW to the intersection with an approximately north-south line located 106 feet east of the northerly extension of 10th Avenue SW; thence southerly along said approximately north-south line approximately 216 feet; thence westerly along an approximately east-west line located approximately 216 feet south of the centerline of said 2nd Street SW, a distance of approximately 306 feet; thence southerly along an approximately north-south line approximately 203 feet; thence easterly along an approximately

east-west line to the centerline of 9th Avenue SW; thence northerly along said centerline to the westerly extension of the south line of the east-west alley lying between 2nd Street SW and 3rd Street SW; thence easterly along said westerly extension and along the south line of said alley to the east line of BLOCK 29, HEAD & McMAHON'S ADDITION; thence southerly along said east line and the southerly extension thereof to the centerline of 3rd Street SW; thence easterly along said centerline to the centerline of 8th Avenue SW; thence southerly along said centerline to the centerline of 4th Street SW; thence easterly along said centerline to centerline of 7th Avenue SW; thence northerly along centerline to the centerline of 2nd Street SW; thence easterly along said centerline to the centerline of 7th Avenue SW running north from 2nd Street SW; thence northerly along said centerline of 7th Avenue SW to the centerline of 1st Street SW; thence westerly along said centerline 235.50 feet; thence southerly parallel with the centerline of 7th Avenue SW, 133 feet; thence westerly parallel with 1st Street SW to the east line of Outlot 4, CUMMINGS ADDITION; thence northerly along said east line to the centerline of 1st Street SW; thence westerly along said centerline to the centerline of 11th Avenue SW; thence southerly along said centerline to the point of beginning.

3) Special District 3 – Medical Transition Area lying adjacent to the two Primary Medical Institutional subdistricts. These subdistricts are legally described as follows:

East Medical Transition Subdistrict (MT-E): Beginning at the centerline intersection of 6th Avenue NW and the south right-of-way line of Civic Center Drive NW (formerly 5th Street NW) and proceeding southeasterly along said south right-of-way to its centerline intersection with 2nd Avenue NW; thence south along the centerline of 2nd Avenue NW approximately 54 feet to the centerline of the right-of-way of the former Chicago and Northwestern Railroad Spur line; thence southeasterly along said railroad right-of-way centerline to the centerline of 1st Avenue NW; thence south along the centerline of 1st Avenue NW to its intersection with the centerline of 3rd Street NW; thence west along the centerline of 3rd Street NW to its intersection with the centerline of 2nd Avenue NW; thence southerly along the centerline of 2nd Avenue NW to its centerline intersection with 2nd Street NW; thence easterly along the centerline of 2nd Street NW to the midblock line between 1st Avenue NW and North Broadway; thence southerly along said midblock line between 1st Avenue NW and North Broadway to its centerline intersection with 1st Street NW; thence westerly to the centerline of 1st Street NW to its centerline intersection with 1st Avenue NW; thence southerly along the centerline of 1st Avenue NW to its intersection with Center Street; thence westerly to the midblock lot line between 1st Avenue SW and 2nd Avenue SW; thence southerly along said midblock lot line extended to its centerline intersection with 3rd Street SW; thence westerly along the centerline of 3rd Street SW to its centerline intersection with 2nd Avenue SW; thence southerly along the centerline extension of 2nd Avenue SW to its intersection with an extension of 7th Street SW; thence westerly

along 7th Street SW extended to its centerline extension with 5th Avenue SW; thence northerly along the centerline of 5th Avenue SW to the midblock line between 5th Street SW and 4th Street SW; thence westerly along said midblock line between 5th Street SW and 4th Street SW to its intersection with 6th Avenue SW; thence northerly along the centerline of 6th Avenue SW to its intersection with the centerline of 4th Street SW; thence westerly along the centerline of 4th Street SW to its intersection with the west property line of LOT 12, BLOCK 16, HEAD AND MCMAHON'S ADDITION; thence northerly along said west property line to the centerline of the alley between 4th Street SW and 3rd Street SW; thence easterly along the centerline of said alley to the centerline of the north-south alley in the block; thence northerly along the centerline of said alley to its extended intersection with the centerline of 3rd Street SW; thence westerly along the centerline of 3rd Street SW to its intersection with the centerline of 7th Avenue SW; thence northerly along the centerline of 7th Avenue SW to its centerline intersection with 2nd Street SW; thence easterly along the centerline of 2nd Street SW to its centerline intersection with 7th Avenue SW; thence northerly along the centerline of 7th Avenue SW to its centerline intersection with 1st Street SW; thence westerly along the centerline of 1st Street SW to the extended east property lines of City parcels 2380-10300 (now PIN#12831) and 2380-10000 (now PIN#12828); thence northerly along said extended east property lines to the intersection with the centerline of West Center Street; thence easterly along the centerline of West Center Street to its intersection with the west property line, extended, of City parcel 2380-8300 (now PIN#12811); then northerly to the centerline intersection with 1st Street NW; thence easterly along the centerline of 1st Street NW to its intersection with the centerline of 7th Avenue NW; thence northerly along 7th Avenue NW to its centerline intersection with 2nd Street NW; thence easterly along the centerline of 2nd Street NW to its centerline intersection with 6th Avenue NW; thence northerly along the centerline of 6th Avenue NW to the point of beginning, less the previously described Primary Medical-Institutional Central Subdistrict.

West Medical Transition Subdistrict (TM-W): Beginning at the centerline intersection of 10th Avenue SW and 4th Street SW; thence southerly along the centerline of 10th Avenue SW to its centerline intersection with 6th Street SW; thence westerly along the centerline of 6th Street SW a distance of approximately 705.5 feet; thence northerly along an approximate north-south line to a point 237.5 north of the centerline of 6th Street SW; thence easterly along a line parallel to the centerline of 6th Street SW to a point 237.5 feet westerly of the centerline of 10th Avenue SW; thence northerly on a line parallel to the centerline of 10th Avenue SW to the intersection with the centerline extended of 4th Street SW; thence easterly along said extended centerline to the point of beginning.

Section 2. This ordinance shall be effective from and after the date of its publication.

PASSED AND ADOPTED BY THE COMMON COUNCIL OF THE CITY OF
ROCHESTER, MINNESOTA, THIS 22nd DAY OF FEBRUARY, 2012.

PRESIDENT OF SAID COMMON COUNCIL

ATTEST:

PART 10.0 | APPENDICES:

MAYO SUPPORT CAMPUS SPECIAL DISTRICT: Zoning Ordinance #3534 (2003)

November 19, 2021

B|W|B|R

ORDINANCE NO. 3534

AN ORDINANCE CREATING AND ENACTING CHAPTER 64N, AND AMENDING AND REENACTING SECTION 60.327 OF THE ROCHESTER CODE OF ORDINANCES, RELATING TO THE ESTABLISHMENT OF THE MAYO SUPPORT CAMPUS SPECIAL DISTRICT.

THE COMMON COUNCIL OF THE CITY OF ROCHESTER DO ORDAIN:

Section 1. Chapter 64N of the Rochester Code of Ordinances is hereby created and enacted to read as follows:

64N. MAYO SUPPORT CAMPUS SPECIAL DISTRICT

64N.100 FINDINGS AND DISTRICT BOUNDARIES.

Subdivision 1. Findings. It is the finding of the Council that the lands described in Subdivision 3 herein which define the property under the ownership and control of the Mayo Clinic are of special and substantial significance to the City of Rochester. In a desire to effectively and efficiently achieve community goals, to assist and encourage the development and expansion of medical support land uses, to comprehensively master plan a phased medical campus, to integrate related medical facilities on a single campus, with skillful architectural and landscape design, and to efficiently plan for future private investment and public capital, the Common Council hereby creates a special zoning district, as provided in Section 62.900 of the Rochester Code of Ordinances (R.C.O.), to be known as the Mayo Support Campus Special District. This determination is based upon the following specific findings:

- A. The land area, the existing land use and existing facility at the Mayo Support Campus provides the opportunity to expand the medical services on a single campus site and to integrate related medical services in an efficient manner.
- B. The land area under the ownership of the Mayo Clinic provides adequate space to buffer neighbors from potential adverse impacts of noise, visual, traffic, and congestion.
- C. The structures and activities on the site are proposed to be confined to an area removed from the boundaries of the site. The physical configurations of and interrelations among the structures and activities are not anticipated to adversely impact adjacent property owners.

- D. Given the unique nature of the Mayo Support Campus operations and the size and arrangement of its site, it is desirable to devise a unique zoning district with specific regulations that will accommodate the needs of the medical campus and adequately guide the expansion of its activities and facilities. In doing so, it will permit the Mayo Clinic to confidently plan for future investment and growth in Rochester at a site that is remote from the downtown campus. Similarly, the City will be able to confidently program its long-range capital investment in the area based on agreed-upon plans.

Subd. 2. Intent. It is the intent of this Ordinance to assist and encourage the development of the medical related support services and activities in a campus setting by creating special zoning approaches. All of the structures and uses of the land are intended, directly or indirectly, to further the purpose of integrating medical support services on a single campus with adequate space for future growth.

- A. Uses of land and structures related to medical and clinical support services including the following:
 - (1) Clinical and Administrative Support Services
 - (a) Facility engineering
 - (b) Human Resources
 - (c) Administrative Services
 - (d) Medical Records
 - (e) Data Processing
 - (f) Laboratory/Laboratory Support
 - (2) Medical
 - (a) Community Medical Practice
 - (b) Research, Development and Testing
- B. Uses of land and structures for light manufacturing, including, but not limited to, printing of brochures, software production, computer enhancement, and technology research and development.
- C. Uses of land and structures for offices, warehousing and storage, park and ride facilities, parking structures, maintenance and vehicular storage garage and utility support facilities.
- D. Uses of land and structures for communication and emergency services, exercise facilities and educational services, cafeteria, day-care facility (employee), and other similar or related uses.
- E. Pedestrian and bicycle facilities and trails with connection to the Douglas Trail system and other similar amenities for use by employees.

F. Storm water detention and related facilities.

These zoning approaches are applicable to institutions, which have ownership of the lands described below.

Subd. 3. Description of Lands Contained Herein. This Ordinance shall apply to the following land located in the City of Rochester, County of Olmsted, State of Minnesota:

Lots 1, 2 and 3, Block 1, Western Digital Technology Park, Olmsted County, Rochester, Minnesota

64N.200. EFFECT OF REGULATIONS.

Subdivision 1. Applicability. The Special District established by this Ordinance shall be an overlay zoning district with unique development standards and procedures applicable to development on the property defined as the Mayo Support Campus, which is the property within the district boundary. Unless otherwise specified within these regulations, all other standards and requirements of the Rochester Zoning Ordinance remain in effect. All uses in the Mayo Support Campus Special District are considered nonresidential uses.

Subd. 2. Zoning Map. The boundary of the Mayo Support Campus Special District shall be identified on the official Zoning Map as "SD-13."

64N.300. MAYO SUPPORT CAMPUS SPECIAL DISTRICT PLANNING DOCUMENTATION.

Subdivision 1. Planning Documents. Permitted land uses and zoning controls within the special district are based upon the concept of site-wide operations and inter-relationships. Specific documents are adopted by resolutions of the Common Council as part of this special district, which reflect this planning concept. These documents will be the specific guide to land uses and phased activities within the boundary of the special district. The specific documents are described as follows:

- A. A long-range Master Plan (General Development Plan), which shall include a narrative of intended uses, general site capacity, structures, proposed land use activities, general locations and separation distances for structures, areas for parking and accesses, provisions for pedestrian and bicycle facilities, and open space.
- B. A Traffic Impact Report with an analysis of existing conditions and full build-out at the proposed campus.

Subd. 2. Approval and Amendment Processes. The Master Plan and Traffic Impact Report, and any amendments thereto, shall be processed under the provisions and criteria of the Zoning Ordinance and Land Development Manual for the City of Rochester. Both the initial approval and subsequent amendment of the Master Plan shall be processed according to the Type III, Phase II process.

Subd. 3. Plan Document Updates. Every five years following the adoption of the Mayo Support Campus Special District, but synchronized with the downtown Medical Campus review periods, the status of all planning documents shall be reviewed. The Mayo Clinic shall make a presentation of plans to the Rochester Planning and Zoning Commission and the Rochester Common Council beginning in 2006. Each presentation shall be in the form of a public hearing with a minimum of ten days notice given in the official newspaper.

64N.400. SPECIAL DISTRICT DEVELOPMENT STANDARDS.

Subdivision 1. Permitted Land Uses. The principal land uses as described in Section 64N.100, Subdivision 2 (A-F), and other similar or related uses, are permitted as of right in the Mayo Campus Special District.

Subd. 2. Floor Area, Lot Coverage, Setbacks, Bufferyards, and Height and Bulk of Structures.

- A. The floor area ratio for the Mayo Support Campus Special District shall not exceed 0.50.
- B. The proportion of impervious surface created by structures and paved areas shall not exceed 60% of the gross area.
- C. Except as provided below, the setback along any property line may be used for pedestrian ways, bikeways, landscaping, and drainage, but not for parking. Existing structures and parking areas located within required setbacks are permitted to remain.

A setback of 100 feet from the right-of-way line of the Douglas Trail shall be required along the exterior property line of the Special District Campus where the Special District boundary adjoins the Douglas Trail, which shall be used only for pedestrian ways, bikeways, landscaping and drainage facilities.

- D. Except for pedestrian ways, bikeways and drainage facilities, the setback area shall be maintained in vegetative cover, which may include the uses in Subdivision 3 (B).

- E. Parking structures shall not exceed four levels of exposed parking or 50 feet in height on the east side of the property. Where a fourth level of exposed parking is proposed, the fourth level shall not have a roof above the parking spaces. Other structures, regardless of their distance from the east property line, shall not exceed five exposed levels or 75 feet in height on the east side of the property.
- F. Lighting for this property shall comply with Lighting Standard B of the Rochester Zoning Ordinance and Land Development Manual and shall be cut-off light fixtures satisfying R.C.O. §63.213(3).
- G. Site design shall be developed to minimize impacts to the adjacent neighborhood, especially from mechanical units, exterior lighting, parking lot and ramp lighting, and noise.
- H. In order to maintain the existing quality and usability of the Douglas Trail, storm water management shall be designed such that surface water runoff will not exceed baseline conditions documented prior to further site development with respect to the Douglas Trail right-of-way. Additionally, a separation from the Douglas Trail right-of-way to the storm water facilities shall be provided to allow maintenance, repair and reconstruction of said facilities to avoid disturbance to the land within the Douglas Trail right-of-way.
- I. To soften the edge of the Campus where it meets the Douglas Trail right-of-way, a bufferyard shall be provided along the entire north and east property line that is comparable to Bufferyard "B," as identified in R.C.O. §63.265.

Subd. 3. Landscaping.

- A. All new surface parking spaces and drives located within the required setback areas shall be by berms and/or landscape plantings. Outside of setback areas, surface parking landscaping shall be provided at a level similar to existing parking lot landscaping.
- B. All setback areas shall be landscaped in accordance with the landscape plan element of the Site Development Plan for each phase. Landscaping of setback areas may include forestry, cropland, pasture, and/or prairie grasses in place of or in addition to conventional landscaping materials. Notwithstanding any other ordinance to the contrary, the Mayo Support Campus Special District is exempt from limits on the height of native or ornamental tall grasses, native or ornamental forbs and shrubs.

Subd. 4. Access, Parking, Circulation, Loading and Signs.

- A. The number of permanent off-street parking and loading spaces required for any new building expansion in the Mayo Support Campus Special District shall be determined by the goals and standards of the Master Plan.
- B. Goal: The parking ratio for the full build-out of the Mayo Support Campus Special District shall be one parking stall for every 240 square feet of gross building area. The specific parking ratios of each phase may vary from this provision depending upon the specific uses.
- C. Parking will be provided on the surface and in structures.
- D. Access to the site is limited to one location onto 41st Street N.W.; one full or cross-over access to West Circle Drive (CSAH #22) at its existing location; and a right in-right out to West Circle Drive opposite the access road to Northern Hills Golf Course.
- E. Load/unload facilities shall be provided in appropriate locations of each structure as detailed on the Site Development Plans for each phase.
- F. Pedestrian trails, pedestrian trail connections to the Douglas Trail, vehicular access drive between and around structures, emergency vehicle drives, and access to perimeter roadways shall be as conceptually shown on the Master Plan and will be more specifically detailed on the Site Development Plan for each phase.
- G. For purposes of this Special District, the permitted signs shall consist of building identification, directional signs and site signs. All signs must meet the standards of Section 63.225 sign type B unless otherwise noted in the Master Plan. The style of the sign must be consistent with the Mayo Clinic standards.

Subd. 5. Hours of Operation. Ordinary hours of operation shall be 24 hours a day, seven days a week in accordance with the various types of land use activities.

64N.500. PERMIT ADMINISTRATION. Subdivision 1. In addition to the requirements of R.C.O. §§61.580 through 61.584, every application for a zoning certificate within the Mayo Support Campus shall be accompanied by a complete and current document which describes the existing number of parking spaces available within the Special District and which certifies that the cumulative total of land uses and structures, including those for which the zoning certificate is sought, do not exceed Special District standards for floor area and impervious surface coverage.

Subd. 2. In order to issue a zoning certificate within the Mayo Support Campus, the zoning administrator must determine if all development standards are met and the proposed use of buildings or structure is consistent with the Special District documents.

64N.600. VARIANCE AND APPEALS. The Rochester Common Council is designated as the Zoning Board of Appeals and will assume the duties of that Board to hear and decide appeals of any decision made by the zoning administrator in the administration and enforcement of this Special District and hear requests for variances from the literal provisions of this Special District.

64N.700 RESCINDING APPROVAL. The Rochester Common Council may, without liability, rescind the provisions of this Special District Ordinance and return the property to its underlying zoning district at the time of adoption or to another zoning district. Rescinding this overlay zoning district must follow the procedures set forth in R.C.O. §60.330.

Section 2. Section 60.327 of the Rochester Code of Ordinance is amended and reenacted to read as follows:

60.327 **SD SPECIAL DISTRICTS:** Existing Special Districts approved by Ordinance numbers 3443, 3404, 2726, 2516, 2247, 3385, 3468, 3497, 3503, 3520 and 3534 are recognized as separate zoning districts and the plans and procedures established for each Special District will continue in force. When a Special District Ordinance does not specify the procedure or criteria to amend an approved site development plan, the proposed amendment will be reviewed under Section 64.148. When a Special District Ordinance requires a two-phase review, the development will be reviewed under Section 61.146 and either Section 62.708 (1) (for preliminary plans) or Section 62.708 (2) (for final plans).

Section 3. This Ordinance shall become effective on and after the date of its Publication.

PASSED AND ADOPTED BY THE COMMON COUNCIL OF THE CITY OF ROCHESTER, MINNESOTA, THIS 22 DAY OF JANUARY, 2003.
